# **Cathay United Bank Co., Ltd. and Subsidiaries**

Consolidated Financial Statements for the Nine Months Ended September 30, 2023 and 2022 and Independent Auditors' Review Report

#### INDEPENDENT AUDITORS' REVIEW REPORT

The Board of Directors and Shareholders Cathay United Bank Co., Ltd.

#### Introduction

We have reviewed the accompanying consolidated balance sheets of Cathay United Bank Co., Ltd. (the "Bank") and its subsidiaries (collectively, the "Company"), as of September 30, 2023 and 2022, the related consolidated statements of comprehensive income for the three months ended September 30, 2023 and 2022 and for the nine months ended September 30, 2023 and 2022, the consolidated statements of changes in equity and cash flows for the nine months then ended, and the related notes to the consolidated financial statements, including material accounting policy information (collectively referred to as the "consolidated financial statements"). Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

# **Scope of Review**

We conducted our reviews in accordance with the Standards on Review Engagements of the Republic of China 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### Conclusion

Based on our reviews, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Company as of September 30, 2023 and 2022, its consolidated financial performance for the three months ended September 30, 2023 and 2022 and its consolidated financial performance and its consolidated cash flows for the nine months ended September 30, 2023 and 2022 in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the reviews resulting in this independent auditors' review report are Shiuh-Ran Cheng and Shu-Wan Lin.

Deloitte & Touche Taipei, Taiwan Republic of China

## Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such consolidated financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' review report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' review report and consolidated financial statements shall prevail.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2023 AND 2022 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

#### 1. INFORMATION ON THE BUSINESS

Cathay United Bank Co., Ltd. (the "Bank"), originally named United World Chinese Commercial Bank (UWCCB), was established in December 1974 after obtaining approval from the Ministry of Finance, Republic of China (ROC) and officially started operations on May 20, 1975. The Bank is mainly engaged in the following operations: (1) all commercial banking operations authorized by the ROC Banking Act ("Banking Act"); (2) international banking business and related operations; (3) trust business; (4) offshore banking business; and (5) other financial operations related to the promotion of investments by overseas Chinese. The Bank's registered office and main business location is at No. 7, Songren Rd., Xinyi District, Taipei City, Republic of China (ROC).

The Bank's stock was originally trading on the Taiwan Stock Exchange (TWSE) until December 18, 2002, where it was delisted after becoming a wholly-owned subsidiary of Cathay Financial Holding Co., Ltd. ("Cathay Financial Holdings") on the same date through a share swap. Under the Financial Institutions Merger Act, the Bank merged with the former Cathay Commercial Bank, a wholly-owned subsidiary of Cathay Financial Holdings on October 27, 2003, with UWCCB as the surviving entity and was renamed Cathay United Bank Co., Ltd.

The Bank merged with Lucky Bank on January 1, 2007. The Bank was the surviving entity after this merger and Lucky Bank was the extinguished entity. In addition, the Bank acquired specific assets, liabilities, and business of China United Trust & Investment Corporation (CUTIC) on December 29, 2007.

Cathay Financial Holdings is the Bank's ultimate parent company.

The consolidated financial statements are presented in the Bank's functional currency, the New Taiwan dollar.

#### 2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements of the Bank and its subsidiaries (collectively, the "Company") were approved by the Bank's board of directors on November 9, 2023.

#### 3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Public Banks and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the "IFRSs") endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Public Banks and the IFRSs endorsed and issued into effect by the FSC did not have a material impact on the Company's accounting policies.

b. The IFRSs endorsed by the FSC for application starting from 2024

New, Amended and Revised Standards and Interpretations	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 16 "Leases Liability in a Sale and Leaseback"	January 1, 2024 (Note 2)
Amendments to IAS 1 "Classification of Liabilities as Current or	January 1, 2024
Non-current"	
Amendments to IAS 1 "Non-current Liabilities with Covenants"	January 1, 2024
Amendments to IAS 7 and IFRS 7 "Supplier Finance Arrangements"	January 1, 2024 (Note 3)

- Note 1: Unless stated otherwise, the above IFRSs will be effective for annual reporting periods beginning on or after their respective effective dates.
- Note 2: A seller-lessee shall apply the Amendments to IFRS 16 retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16.
- Note 3: The part of disclosure requirements will be exempted upon the initial application of amendments.

The Company assessed that the application of the above standards and interpretations will not have a material impact on the Company's financial position and financial performance.

c. The IFRSs in issue but not yet endorsed and issued into effect by the FSC

New, Amended and Revised Standards and Interpretations	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"	To be determined by IASB
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 "Initial Application of IFRS 17 and IFRS 9 - Comparative Information"	January 1, 2023
Amendments to IAS 21 "Lack of Exchangeability"	January 1, 2025 (Note 2)

- Note 1: Unless stated otherwise, the above IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.
- Note 2: An entity shall apply those amendments for annual reporting periods beginning on or after January 1, 2025. Upon initial application of the amendments, the entity recognizes any effect as an adjustment to the opening balance of retained earnings. When the company uses a presentation currency other than its functional currency, it shall, at the date of initial application, recognize any effect as an adjustment to the cumulative amount of translation differences in equity.

As of the date the consolidated financial statements were authorized for issue, the Company assessed that the application of the above standards and interpretations will not have a material impact. The Company is continuously assessing the possible impact of the application of other standards and interpretations on the Company's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

#### 4. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

#### **Statement of Compliance**

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks and IAS 34 "Interim Financial Reporting" as endorsed and issued into effect by the FSC. Disclosure information included in the consolidated financial statements is less than that required in a complete set of annual financial statements.

# **Basis of Preparation**

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments and investment properties which are measured at fair value, and net defined benefit liabilities which are measured at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- a. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- b. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- c. Level 3 inputs are unobservable inputs for the asset or liability.

#### **Basis of Consolidation**

#### Principles for preparing the consolidated financial statements

The consolidated financial statements incorporate the financial statements of the Bank and the entities controlled by the Bank (Indovina Bank, CUBC Bank and CUBCN Bank).

The accounting policies of the consolidated entities are same.

All intercompany transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Bank and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Company's ownership interests in subsidiaries that do not result in the Company losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the interests of the Company and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Bank.

The Bank's financial statements include the accounts of the head office, all branches, and OBU, in addition to the subsidiaries' accounts. All intercompany transactions and accounts balances have been eliminated for consolidation purposes.

# Entities included in the consolidated financial statements

See Note 16 for detailed information on subsidiaries (including percentages of ownership and main businesses).

# **Foreign Currencies**

In preparing the financial statements of each entity in the group, transactions in currencies other than the Company's functional currency (i.e., foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise except for exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investments.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which cases, the exchange differences are also recognized in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Company's foreign operations (including subsidiaries, associates, joint ventures and branches in other countries that use currencies which are different from the currency of the Company) are translated into the presentation currency, the New Taiwan dollar, as follows: Assets and liabilities are translated at the exchange rates prevailing at the end of the reporting period; and income and expense items are translated at the exchange rates prevailing at the time of the transactions or the average exchange rates for the period. The resulting currency translation differences are recognized in other comprehensive income (attributed to the owners of the Bank and non-controlling interests as appropriate).

#### **Current and Non-current Assets and Liabilities**

Since the operating cycle in the banking industry cannot be reasonably identified, accounts included in the consolidated financial statements of the Company were not classified as current or non-current. Nevertheless, accounts were properly categorized in accordance with the nature of each account and sequenced by their liquidity.

## **Cash and Cash Equivalents**

In the consolidated balance sheets, cash and cash equivalents comprise cash on hand, due from banks, and short-term, highly liquid time deposits that mature within 12 months from the date of acquisition and readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. In the consolidated statements of cash flows, cash and cash equivalents comprise cash and cash equivalents, due from the Central Bank, call loans to other banks, and securities purchased under resell agreements as reported in the consolidated balance sheets that correspond to the definition of cash and cash equivalents under IAS 7 "Statement of Cash Flows," as endorsed and issued into effect by the FSC.

## **Financial Instruments**

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized in profit or loss.

#### a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

#### 1) Measurement categories

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortised cost, and investments in debt instruments and equity instruments at FVTOCI.

## a) Financial assets at FVTPL

A financial asset is classified as at FVTPL when the financial asset is mandatorily classified or designated as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset.

Fair value is determined in the manner described in Note 49.

#### b) Financial assets at amortised cost

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- i. The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortised cost, including cash and cash equivalents, due from the Central Bank and call loans to banks, investments in debt instruments at amortised cost, receivables and discounts and loans, are measured at amortised cost, which equals the gross carrying amount determined by the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for:

i. Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset; and

ii. Financial assets that are not credit-impaired on purchase or origination but have subsequently become credit-impaired, for which interest income is calculated by applying the effective interest rate to the amortised cost of such financial assets in subsequent reporting periods.

A financial asset is credit-impaired when one or more of the following events have occurred:

- i. Significant financial difficulty of the issuer or the borrower;
- ii. Breach of contract, such as a default;
- iii. It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv. The disappearance of an active market for that financial asset because of financial difficulties.

## c) Investments in debt instruments at FVTOCI

Debt instruments that meet the following conditions are subsequently measured at FVTOCI:

- i. The financial asset is held within a business model whose objective is achieved by both the collecting of contractual cash flows and the selling of the financial assets; and
- ii. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in debt instruments at FVTOCI are subsequently measured at fair value. Changes in the carrying amounts of these debt instruments relating to changes in foreign currency exchange rates, interest income calculated using the effective interest method and impairment losses or reversals are recognized in profit or loss. Other changes in the carrying amount of these debt instruments are recognized in other comprehensive income and will be reclassified to profit or loss when the investment is disposed of.

# d) Investments in equity instruments at FVTOCI

On initial recognition, the Company may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation as at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments; instead, they will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

## 2) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets at amortised cost, and investments in debt instruments measured at FVTOCI.

The Company always recognizes lifetime expected credit losses (ECLs) for accounts receivable and lease receivables. For all other financial instruments, the Company recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

For receivables that do not contain a significant financing component, the allowance for losses is recognized at an amount equal to lifetime ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of a default occurring as the weights. A 12-month ECL represents the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument.

The definition of the financial assets in default is described in Note 50.

The impairment loss of all financial assets is recognized in profit or loss by a reduction in their carrying amounts through a loss allowance account, except for investments in debt instruments at FVTOCI, for which the loss allowance is recognized in other comprehensive income and the carrying amounts of such financial assets are not reduced.

According to the Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrual Loans, the Bank assesses the customers' financial position, the overdue payments of the principal and interest, and the value of collateral to classify credit assets into normal credit assets (excluding loans to the ROC government) and unsound assets which should be further classified as special mention, substandard, doubtful and losses, for which the minimum provisions are 1%, 2%, 10%, 50%, and 100% of the outstanding balance, respectively. Furthermore, the FSC stipulates that banks should recognize provision of at least 1.5% of normal credit assets in mainland China (including short-term advances for trade finance) and loans for mortgage and construction loans that have been classified as normal assets, and further determine the allowance for losses based on the higher of the above-mentioned provision and the assessment of the expected credit losses.

The Company writes off credits deemed uncollectable after the write-off is proposed and approved by the board of directors. Recoveries of credits written off are recognized as a reversal of loss provision in the current period.

# 3) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset at amortised cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. On derecognition of an investment in a debt instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the cumulative gain or loss that had been recognized in other comprehensive income is transferred directly to retained earnings, without recycling through profit or loss.

## b. Equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual agreements and the definitions of a financial liability or an equity instrument.

Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Company's own equity instruments is recognized and deducted directly from equity, and its carrying amounts are calculated based on weighted average by share types and calculated separately by repurchase category. No gain or loss is recognized in profit or loss on the purchase, sale, issuance or cancellation of the Company's own equity instruments.

#### c. Financial liabilities

#### 1) Subsequent measurement

Except for the cases stated below, all financial liabilities are measured at amortised cost using the effective interest method:

#### a) Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liabilities are either held for trading or designated as at FVTPL.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability.

A financial liability is classified as designated as at FVTPL upon initial recognition if:

- i. Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- ii. The financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- iii. The contract contains one or more embedded derivatives so that the entire hybrid (combined) contract can be designated as at fair value through profit or loss.

For a financial liability designated as at FVTPL, the amount of changes in fair value attributable to changes in the credit risk of the liability is presented in other comprehensive income, and it will not be subsequently reclassified to profit or loss. The gain or loss accumulated in other comprehensive income will be transferred to retained earnings when the financial liabilities are derecognized. The changes in fair value of the outstanding liabilities are recognized in profit or loss. If this accounting treatment related to credit risk would create or enlarge an accounting mismatch, all changes in fair value of the liability are presented in profit or loss.

Fair value is determined in the manner described in Note 49.

# b) Financial guarantee contracts

Financial guarantee contracts issued by the Company, if not designated as at FVTPL, are subsequently measured at the higher of:

- i. The amount of the loss allowance reflecting expected credit loss; and
- ii. The amount initially recognized less, where appropriate, the cumulative amount of income recognized in accordance with the revenue recognition policies.

### 2) Derecognition of financial liabilities

The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

#### d. Derivatives

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the balance sheet date. The resulting gain or loss is recognized in profit or loss immediately. When the fair value of a derivative financial instrument is positive, the derivative is recognized as a financial asset; when the fair value of a derivative financial instrument is negative, the derivative is recognized as a financial liability.

Derivatives embedded in hybrid contracts that contain financial asset hosts within the scope of IFRS 9 are not separated; instead, the classification is determined in accordance with the entire hybrid contract. Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of IFRS 9 (e.g., financial liabilities) are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

#### e. Modification of financial instruments

When a financial instrument is modified, the Bank assesses whether the modification will result in derecognition. If modification of a financial instrument results in derecognition, it is accounted for as derecognition of financial assets or liabilities. If the modification does not result in derecognition, the Bank recalculates the gross carrying amount of the financial asset or the amortised cost of the financial liability based on the modified cash flows discounted at the original effective interest rate with any modification gain or loss recognized in profit or loss. The cost incurred is adjusted to the carrying amount of the modified financial asset or financial liability and amortised over the modified remaining period.

For the changes in the basis for determining contractual cash flows of financial assets or financial liabilities resulting from the interest rate benchmark reform, the Bank elects to apply the practical expedient in which the changes are accounted for by updating the effective interest rate at the time the basis is changed, provided the changes are necessary as a direct consequence of the reform and the new basis is economically equivalent to the previous basis. When multiple changes are made to a financial asset or a financial liability, the Bank first applies the practical expedient to those changes required by interest rate benchmark reform, and then applies the requirements of modification of financial instruments to the other changes that cannot apply the practical expedient.

#### **Investments in Associates**

An associate is an entity over which the Bank has significant influence and which is neither a subsidiary nor an interest in a joint venture.

The Bank uses the equity method to account for its investments in associates. Under the equity method, investments in an associate are initially recognized at cost and adjusted thereafter to recognize the Bank's share of the profit or loss and other comprehensive income of the associate. The Bank also recognizes the changes in the Bank's share of the equity of associates attributable to the Bank.

Any excess of the cost of acquisition over the Bank's share of the net fair value of the identifiable assets and liabilities of an associate at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortised. Any excess of the Bank's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition is recognized immediately in profit or loss

When the Bank subscribes for additional new shares of an associate at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Bank's proportionate interest in the associate. The Bank records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus - changes in capital surplus from investments in associates accounted for using the equity method. If the Bank's ownership interest is reduced due to its additional subscription of the new shares of the associate, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate is reclassified to profit or loss on the same basis as would be required had the investee directly disposed of the related assets or liabilities. When the adjustment should be debited to capital surplus, but the capital surplus recognized from investments measured by equity method is insufficient, the shortage is debited to retained earnings.

When the Bank's share of losses of an associate equals or exceeds its interest in that associate (which includes any carrying amount of the investment accounted for using the equity method and long-term interests that, in substance, form part of the Bank's net investment in the associate), the Bank discontinues recognizing its share of further loss, if any. Additional losses and liabilities are recognized only to the extent that the Bank has incurred legal obligations, or constructive obligations, or made payments on behalf of that associate.

The entire carrying amount of an investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized is not allocated to any asset, including goodwill, which forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

The Bank discontinues the use of the equity method from the date on which its investment ceases to be an associate. Any retained investment is measured at fair value at that date, and the fair value is regarded as the investment's fair value on initial recognition as a financial asset. The difference between the previous carrying amount of the associate attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate. The Bank accounts for all amounts previously recognized in other comprehensive income in relation to that associate on the same basis as would be required had that associate directly disposed of the related assets or liabilities. If an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the Bank continues to apply the equity method and does not remeasure the retained interest.

Profits or losses resulting from downstream transactions are eliminated in full only in the Bank's financial statements. Profits and losses resulting from upstream transactions and transactions between associates are recognized only in the Bank's financial statements only to the extent of interests in the associates that are not related to the Bank.

## **Nonperforming Loans**

Under the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Nonperforming/Nonaccrual Loans" issued by the authorities, loans and other credits (including the accrued interest) that remain unpaid on their maturity are transferred immediately to nonperforming loans if the transfer is approved by the board of directors.

Nonperforming loans transferred from loans are recognized as discounts and loans, and those transferred from other credits are recognized as other financial assets.

## **Repurchase and Resale Transactions**

Securities purchased under resell agreements and securities sold under repurchase agreements are generally treated as collateralized financing transactions. Interest earned on reverse repurchase agreements or interest incurred on repurchase agreements is recognized as interest income or interest expense over the life of each agreement.

# **Property and Equipment**

Property and equipment are stated at cost less accumulated depreciation and accumulated impairment loss.

Property and equipment in the course of construction are measured at cost less any recognized impairment loss. Cost includes professional fees and borrowing costs eligible for capitalization. Before that asset reaches its intended use are measured at the lower of cost or net realizable value, and any proceeds and cost are recognized in profit or loss. Such assets are depreciated and classified to the appropriate categories of property and equipment when completed and ready for their intended use.

Freehold land is not depreciated. Depreciation of property and equipment is recognized using the straight-line method. Each significant part is depreciated separately. If the lease term of an item of property and equipment is shorter than its useful life, such asset is depreciated over its lease term. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effects of any changes in the estimates accounted for on a prospective basis.

If the house that is exchanged for land under the jointly constructed with house divided contract is classified as real estate and equipment and the exchange has commercial substance, the exchange gains and losses are recognized when exchanged.

On derecognition of an item of property and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

#### **Investment Properties**

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties also include land held for a currently undetermined future use.

Investment properties are measured initially at cost, including transaction costs, and are subsequently measured using the fair value model. Changes in the fair value of investment properties are included in profit or loss for the period in which they arise.

On derecognition of an investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

The Bank decides to transfer assets to or from investment property based on the actual use of assets.

For a transfer from the property and equipment classification to investment property based on the actual use of assets, any difference between the fair value of the property at the transfer date and its previous carrying amount is recognized in other comprehensive income and accumulated in gain on property revaluation under other equity that will be transferred directly to retained earnings when the asset is derecognized.

#### Goodwill

Goodwill arising from the acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment loss.

For the purposes of impairment testing, goodwill is allocated to each of the Company's cash-generating units or groups of cash-generating units (referred to as "cash-generating units") that are expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually or more frequently when there is an indication that the unit may be impaired, by comparing its carrying amount, including the attributed goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit was acquired in a business combination during the current annual period, that unit shall be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then pro rata to the other assets of the unit based on the carrying amount of each asset in the unit. Any impairment loss is recognized directly in profit or loss. Any impairment loss recognized on goodwill is not reversed in subsequent periods.

If goodwill has been allocated to a cash-generating unit and the entity disposes of an operation within that unit, the goodwill associated with the operation which is disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal and is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained.

### **Foreclosed Collateral**

Collateral assumed (recorded in other assets) are recognized at cost, which includes the assumed prices and any necessary repairs to make the collateral saleable, and evaluated at the lower of cost or net realizable value as of the balance sheet date.

#### **Intangible Assets (Excluding Goodwill)**

a. Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis. The estimated useful lives, residual values, and amortization methods are reviewed at the end of each reporting period, with the effect of any changes in the estimates accounted for on a prospective basis.

# b. Derecognition

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

# Impairment of Property and Equipment, Right-of-use Assets and Intangible Assets (Excluding Goodwill)

At the end of each reporting period, the Company reviews the carrying amounts of its property and equipment, right-of-use asset and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered any impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Corporate assets are allocated to cash-generating units on a reasonable and consistent basis of allocation.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the corresponding asset, cash-generating unit or assets related to contract costs is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized on the asset, cash-generating unit or assets related to contract costs in prior years. A reversal of an impairment loss is recognized in profit or loss.

#### **Assets Held for Sale**

Assets are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition. To meet the criteria for the sale being highly probable, the appropriate level of management must be committed to the sale, and the sale should be expected to qualify for recognition as a completed sale within 1 year from the date of classification.

Assets classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell. Such assets classified as held for sale are not depreciated.

## Leasing

At the inception of a contract, the Company assesses whether the contract is, or contains, a lease.

# a. The Company as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Lease payments (less any lease incentives payable) from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases. Initial direct costs incurred in obtaining operating leases are added to the carrying amounts of the underlying assets and recognized as expenses on a straight-line basis over the lease terms.

Variable lease payments that do not depend on an index or a rate are recognized as income in the periods in which they are incurred.

When a lease includes both land and building elements, the Company assesses the classification of each element separately as a finance or an operating lease based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Company. The lease payments are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of a contract. If the allocation of the lease payments can be made reliably, each element is accounted for separately in accordance with its lease classification. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease unless it is clear that both elements are operating leases; in which case, the entire lease is classified as an operating lease.

### b. The Company as lessee

The Company recognizes right-of-use assets and lease liabilities for all leases at the commencement date of the lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the consolidated balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments, which comprise fixed payments, in-substance fixed payments, variable lease payments which depend on an index or a rate, residual value guarantees, the exercise price of a purchase option if the Company is reasonably certain to exercise that option, and payments of penalties for terminating a lease if the lease term reflects such termination, less any lease incentives receivable. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses its incremental borrowing rate.

Subsequently, lease liabilities are measured at amortised cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, a change in the amounts expected to be payable under a residual value guarantee, a change in the assessment of an option to purchase an underlying asset, or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Company remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the consolidated balance sheets.

Variable lease payments that do not depend on an index or a rate are recognized as expenses in the periods in which they are incurred.

#### **Provisions**

Provisions are recognized when a present obligation (legal or constructive) is due to a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are the best estimate of the consideration required to settle a present obligation at the consolidated balance sheet date, taking the risks and uncertainties on the obligation into account. Provisions are measured using the discounted cash flows estimated to settle the present obligation.

# **Employee Benefits**

#### a. Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

#### b. Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered services entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under the defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost and past service cost) and net interest on the net defined benefit liabilities (assets) are recognized as employee benefits expense in the period in which they occur. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in other equity and will not be reclassified to profit or loss.

Net defined benefit liabilities (assets) represent the actual deficit (surplus) in the Company's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determined pension cost rate at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant plant amendments, settlements, or other significant one-off events.

#### c. Termination benefits

A liability for a termination benefit is recognized at the earlier of when the Company can no longer withdraw the offer of the termination benefit and when the Company recognizes any related restructuring costs.

# d. Employee preferential interest rate deposits

The Bank offers preferential interest rate deposits for its current employees, which include preferential deposits and post-retirement preferential deposits for its current employees as well as preferential deposits for its retired employees, limited to a certain amount. The difference between the preferential interest rate and the market rate is considered as employee benefits.

In accordance with Article 30 of the Regulations Governing the Preparation of Financial Reports by Public Banks, the excess of the interests incurred in post-employment preferential interest deposits over those imputed at the market rate should qualify as post-employment benefits under IAS 19 "Employee Benefits" since the beneficiaries are retired employees. The retirement benefits should be accrued by actuarial method.

#### **Income Tax**

Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated by applying to an interim period's pre-tax income the tax rate that would be applicable to expected total annual earnings.

#### a. Current tax

Income tax payable (recoverable) is based on taxable profit (loss) for the period determined according to the applicable tax laws of each tax jurisdiction.

According to the Income Tax Act in the ROC, an additional tax on unappropriated earnings is provided for as income tax in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

Since 2002, in accordance with Article 49 of the Financial Holding Company Act, the Bank's financial holding company, as the taxpayer, and the Bank elected to jointly declare and report income tax of profit-seeking enterprise and tax surcharge on surplus retained earnings of profit-seeking enterprise in accordance with the relevant provisions of the Income Tax Act. Additional tax payable or tax receivable due to the joint declaration of income tax is recognized under the payables or receivables for allocation of integrated income tax system account.

#### b. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates and interests in joint ventures, except where the Bank is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are recognized only to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and these differences are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liabilities are settled or the assets are realized, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets should reflect the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

If investment properties measured using the fair value model are non-depreciable assets, or are held under a business model whose objective is not to consume substantially all of the economic benefits embodied in the assets over time, the carrying amounts of such assets are presumed to be recovered entirely through sale.

#### c. Current and deferred taxes

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

#### **Recognition of Interest Revenue and Expense**

Except for the financial assets and liabilities at fair value through profit or loss, the interest revenue and interest expense arising from all interest-bearing financial instruments are calculated using the effective interest method in accordance with the relevant regulations and standards and recognized in the consolidated statement of profit or loss under "interest revenue" and "interest expense" items.

## **Recognition of Service Fee Revenue and Expense**

The service fee revenue and expense are generally recognized upon completion of the service to the customer for loan or other services; the service fee earned by the execution of the major project is recognized at the completion of the major project; the service fee revenue and expense related to subsequent lending services are either recognized over the service period or included in the calculation of the effective interest rate on loans and receivables.

#### **Customer Loyalty Program**

The points earned by customers under loyalty programs are treated as multiple-element revenue arrangements, in which consideration is allocated to the goods or services and the award credits based on their fair values through the eyes of the customer. The consideration is not recognized as earnings at the time of the original sales transaction but at the time when the points are redeemed and the obligation is fulfilled.

# 5. MATERIAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, the Company's management is required to make judgments, estimations and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

# **Assessment of Impairment of Loans**

The assessment of impairment of loans is based on the value of the collateral, amount of principal and interest due, and the length of the overdue period. Changes in credit ratings on individual assets and the status of the collection are also considered during classification of the loans. The Company uses judgment in making these assumptions and in selecting the inputs to the impairment calculation, based on the Company's historical experience, existing market conditions as well as forward looking estimates at the end of each reporting period. The inputs include risk of default and expected loss rates. For details of the key assumptions and inputs used, refer to Note 50.

# 6. CASH AND CASH EQUIVALENTS

	September 30, 2023	December 31, 2022	September 30, 2022
Cash on hand	\$ 22,805,568	\$ 25,744,576	\$ 19,389,254

	<u>\$ 429,038,758</u>	<u>\$ 266,322,216</u>	<u>\$ 350,548,777</u>

# The Bank

As provided by the Central Bank of the ROC, NTD-denominated deposit reserves are determined monthly at prescribed rates on the average balances of customers' NTD-denominated deposits, and the deposit reserves account B is subject to withdrawal restrictions.

In addition, the foreign-currency deposit reserves are determined at prescribed rates on balances of additional foreign-currency deposits and recorded as deposit reserves - foreign currency account. These non-interest bearing reserves may be withdrawn at any time. As of September 30, 2023, December 31, 2022 and September 30, 2022, the balances of foreign-currency deposit reserves were \$3,524,344 thousand, \$4,298,282 thousand and \$5,474,004 thousand, respectively.

#### Indovina Bank

In accordance with the relevant local laws and regulations governing credit institutions, the amounts of compulsory reserves for the State Bank of Vietnam were \$1,145,911 thousand, \$1,381,026 thousand and \$1,606,614 thousand as of September 30, 2023, December 31, 2022 and September 30, 2022, respectively.

# **CUBC** Bank

In accordance with the relevant local laws and regulations governing credit institutions, the amounts of compulsory reserves for the National Bank of Cambodia were \$1,664,726 thousand, \$1,182,039 thousand and \$1,094,108 thousand as of September 30, 2023, December 31, 2022 and September 30, 2022, respectively.

# **CUBCN Bank**

In accordance with the relevant local laws and regulations governing credit institutions, the amounts of compulsory reserves for the People's Bank of China were \$4,592,387 thousand, \$4,992,913 thousand and \$4,554,182 thousand as of September 30, 2023, December 31, 2022 and September 30, 2022, respectively.

#### 8. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

As of September 30, 2023, December 31, 2022 and September 30, 2022, none of the financial assets at FVTPL was sold under repurchase agreements.

# Financial Liabilities Designated as at Fair Value through Profit or Loss

In September 2014, the Bank was authorized to issue subordinated financial debentures amounting to US\$990 million; as of October 8, 2014, the issued subordinated financial debentures were US\$660 million (perpetual) and US\$330 million (fifteen years) with a fixed interest rate of 5.10% and 4.00%, respectively, and the interest is payable annually. The Bank is authorized by the authorities to redeem the US\$660 million of bonds at book value after 12 years and after fulfilling the specified conditions.

In March 2017, the Bank was authorized to issue unsubordinated financial debentures amounting to US\$300 million (thirty-years), which were subsequently issued on November 24, 2017. In addition to the redemption of bonds by the exercise of call options, the bonds are redeemable on maturity; the bonds were issued in the form of zero-coupon bonds, and the internal rate of return is 4.10%.

The Bank converted fixed interest rates into floating interest rates with interest rate swap contracts to hedge against the fair value risk resulting from interest rate fluctuations. For the nine months ended September 30, 2023 and 2022, such interest rate swaps were valued with a net loss of \$812,073 thousand and \$4,699,190 thousand, respectively.

These investments in equity instruments are held for medium to long-term strategic purposes and expect to profit from long-term investment. Accordingly, the management elected to designate these investments in equity instruments as at FVTOCI as they believe that recognizing short-term fluctuations in these investments' fair value in profit or loss would not be consistent with the Company's strategy of holding these investments for long-term purposes.

In consideration of its investment strategy, the Bank sold its investments in equity instruments at FVTOCI with the fair value of \$21,792,578 thousand and \$26,142,147 thousand during the nine months ended September 30, 2023 and 2022, respectively, and the related unrealized loss of \$946,978 thousand and \$1,452,316 thousand were transferred from other equity to retained earnings, accordingly.

Dividends of \$1,572,447 thousand and \$1,446,242 thousand were recognized as income for the nine months ended September 30, 2023 and 2022, respectively. Those related to investments held as of September 30, 2023 and 2022 were \$1,070,444 thousand and \$643,264 thousand, respectively, and the remaining amounts were related to investments derecognized for the nine months ended September 30, 2023 and 2022.

As of September 30, 2023, December 31, 2022 and September 30, 2022, certain financial assets at FVTOCI were sold under repurchase agreements with notional amounts of \$36,319,682 thousand, \$20,288,287 thousand and \$28,457,555 thousand, respectively. The proceeds amounting to \$31,626,590 thousand, \$18,969,910 thousand and \$26,143,114 thousand, respectively, were recorded as notes and bonds sold under repurchase agreements and were repurchased for \$32,103,313 thousand, \$19,113,099 thousand and \$26,218,440 thousand before the end of March 2024, May 2023 and March 2023, respectively.

Refer to Note 45 for information relating to financial assets at fair value through other comprehensive income pledged as security.

#### 10. INVESTMENTS IN DEBT INSTRUMENTS AT AMORTISED COST

	September 30, 2023	December 31, 2022	September 30, 2022

	\$ 564,832,476	\$ 516,862,982	<u>\$ 478,575,106</u>

For the nine months ended September 30, 2023 and 2022, the Company disposed of certain bonds in advance due to the expected increase in credit risk, and recognized the gain arising from derecognition of financial assets measured at amortised cost amounting to \$195 thousand and \$80,760 thousand, respectively.

As of September 30, 2023, December 31, 2022 and September 30, 2022, certain financial assets measured at amortised cost were sold under repurchase agreements with notional amounts of \$2,569,985 thousand, \$16,286,483 thousand and \$14,456,797 thousand, respectively. The proceeds amounting to \$1,896,211 thousand, \$11,761,896 thousand and \$10,684,327 thousand, respectively, were recorded as notes and bonds sold under repurchase agreements and were repurchased for \$1,914,712 thousand, \$11,835,606 thousand and \$10,719,157 thousand before the end of November 2023, March 2023 and December 2022, respectively.

Refer to Note 45 for information relating to investments in debt instruments at amortised cost pledged as security.

#### 11. CREDIT RISK MANAGEMENT FOR INVESTMENTS IN DEBT INSTRUMENTS

The credit risk management of the Company's financial assets at FVTOCI and investments in debt instruments at amortised cost is described as follows:

### September 30, 2023

	Financial Assets at FVTOCI	Investments in Debt Instruments at Amortised Cost	Total
Gross carrying amount Less: Allowance for impairment loss Adjustment to fair value	\$ 353,632,607 (190,666) (18,471,643) \$ 334,970,298	\$ 564,897,235 (64,759) 	\$ 918,529,842 (255,425) (18,471,643) \$ 899,802,774

The Company monitors the external credit rating information and price movements of their investments in debt instruments in order to assess whether there has been a significant increase in credit risk since initial recognition.

The Company takes into consideration the multi-period default probability table for each credit rating supplied by external rating agencies, the current financial condition of debtors, industry forecasts, rating of securities issued by credit rating agencies and recovery rates of different types of bonds to assess the 12-month or lifetime expected credit losses.

The carrying amounts of financial assets at FVTOCI and investments in debt instruments at amortised cost sorted by credit rating of the Company are as follows:

Credit Rating	Definition	Basis for Recognizing ECLs	Gross Carrying Amount at September 30, 2023
Low credit risk Significant increase in credit risk Default	Low credit risk at the reporting date Credit risk has increased significantly since initial recognition Objective evidence of impairment at the	12-month ECLs Lifetime ECLs (not credit-impaired) Lifetime ECLs	\$ 917,811,838 450,176 267,828

As of September 30, 2023, December 31, 2022 and September 30, 2022, no property and equipment was pledged.

As of December 31, 2021, the Bank disposed of two vacant premises and classified them as assets held for sale with a carrying amount of \$283,087 thousand. The two premises were originally used for the Bank's office and business warehouse. In January and April 2022, the Bank disposed the premises for proceeds of \$23,700 thousand and \$700,000 thousand, respectively, and recognized a disposal gain of \$440,613 thousand. No impairment loss was recognized on the classification of the premises as assets held for sale for the year ended December 31, 2022.

#### 19. LEASE AGREEMENTS

#### a. Right-of-use assets

Note: Compensation for urban renewal and demolition.

- a. As of September 30, 2023, December 31, 2022 and September 30, 2022, no investment property was pledged.
- b. Some of the Bank's properties are held for earning rental income or for capital appreciation, while some are for self-use. When the part held for self-use is less than 5% of the individual real estate, the real estate is classified as investment properties.

c. The fair values of the Bank's investment properties were based on the valuations carried out by qualified real estate appraisers in Taiwan in accordance with the "Regulations on Real Estate Appraisal." The valuation dates were June 30, 2023, December 31, 2022 and June 30, 2022, respectively. The appraisers had reviewed the original valuation reports issued on the aforementioned valuation dates and clarified that the valuation reports were in effect on September 30, 2023 and 2022, respectively.

Appraiser Office	June 30, 2023	December 31, 2022	June 30, 2022
REPro Knight Frank Real Estate Appraiser Firm	Xiang-Yi, Hsu; You-Xiang, Cai	Xiang-Yi, Hsu; You-Xiang, Cai	Xiang-Yi, Hsu; Hong-Xu, Wu; You-Xiang, Cai

The fair value is supported by observable evidence in the market. The main appraisal approaches applied include the income approach (such as discounted cash flow model and direct capitalization approach), comparison approach and cost approach. The significant unobservable inputs mainly include discount rates and the related adjustments, and categorized as level 3 of fair value hierarchy.

1) As office buildings have market liquidity and the rentals are similar to those of comparable properties in neighboring areas, the fair values have been mainly determined using the comparison approach and the income approach.

Net rental income is based on current market practices, assuming an annual rental increase between 0% to 1.5% to extrapolate the total income of the underlying property, excluding losses as a result of idle and other reasons and related operation costs.

According to the ROC Real Estate Appraisers Association Gazette No. 5, the house tax is determined based on the reference tables of current house values provided by each city/county to estimate the total current house value considering the area of the subject property and related public utilities. House tax is calculated based on the tax rates in the House Tax Act and the actual payment data.

Land value tax is calculated based on the changes in the announced land values of the underlying property in the past years and the actual payment data.

According to the ROC Real Estate Appraisers Association Gazette No. 5, replacement allowance for significant renovation cost is calculated based on 10% of construction costs and amortised over its estimated useful life of 20 years.

The main inputs used are as follows:

	December 31,					
	June 30, 2023	2022	June 30, 2022			
Direct capitalization rates	1.13%-4.03%	1.13%-4.03%	1.14%-4.03%			
Overall capital interest rate	0.95%-2.86%	0.84%-2.50%	0.76%-2.21%			

## Operating expenses directly related to investment properties

	For th	For the Three Months Ended September 30			For the Nine Months Endo September 30			inded
	20	23	20	022	202	23	20	22
Generating rental income Not generating rental	\$	-	\$	-	\$	-	\$	-
income		338		<u>364</u>	1	<u>,670</u>	2	<u>2,788</u>
	<u>\$</u>	338	<u>\$</u>	364	<u>\$ 1</u>	<u>,670</u>	<u>\$ 2</u>	<u>2,788</u>

<sup>2)</sup> The fair values of hillside conservation zones, farmlands and scenic areas had been determined mainly by the land development analysis and comparison approaches due to fewer market transactions in such areas as a result of legal restrictions and furthermore, no significant changes are expected in these areas that will affect the market in the near future.

The Bank acquired China United Trust & Investment Corporation on December 29, 2007 and recognized goodwill amounting to \$6,673,083 thousand.

The Bank acquired 70% of the shares of CUBC Bank on December 13, 2012 and recognized goodwill amounting to US\$10,570 thousand, then further acquired the remaining 30% of shares on September 16, 2013.

During impairment testing of goodwill, the Bank treated individual business units as cash-generating units (CGUs). Goodwill resulting from the merger was allocated to the relevant CGUs. The recoverable amount was determined by the value in use of each CGU and was calculated at the present values of the cash flow forecast for the future based on the going-concern assumption. Future cash flows were estimated on the basis of present operations and will be adjusted depending on the business outlook and economic trends.

#### 30. RETIREMENT BENEFIT PLANS

# a. Defined contribution plan

The Bank adopted a pension plan under the Labor Pension Act (LPA), which is a state-managed defined contribution plan. Under the LPA, the Bank makes monthly contributions equal to 6% of each employee's monthly salary to employees' pension accounts in the Bureau of Labor Insurance.

For the nine months ended September 30, 2023 and 2022, the Company recognized expenses of \$396,295 thousand and \$341,330 thousand in the consolidated statements of comprehensive income in accordance with the defined contribution plan, respectively.

#### b. Defined benefit plan

The defined benefit plan adopted by domestic branches of the Bank under the Labor Standards Law is operated by the government of the ROC. Pension benefits are calculated on the basis of the length of service and average monthly salaries of the 6 months before retirement. The Bank contributes a fixed proportion of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Pension contributions are deposited in the Bank of Taiwan in the committee's name.

The Bank uses the actuarially determined pension cost rate as of December 31, 2022 and 2021 respectively. For the nine months ended September 30, 2023 and 2022, pension expenses under the defined benefit plan recognized in the consolidated statements of comprehensive income amounted to \$185,054 thousand and \$151,077 thousand, respectively.

#### c. Employee preferential interest rate deposit plan

For the nine months ended September 30, 2023 and 2022, current employee preferential interest rate deposit plan expenses amounted to \$132,788 thousand and \$187,613 thousand, respectively; retired employee preferential interest rate deposit plan expenses amounted to \$25,240 thousand and \$26,250 thousand, respectively.

	\$ 38,869,080	\$ 38,858,661	<u>\$ 38,687,276</u>

#### c. Legal reserve

Retained earnings are appropriated to legal reserve until the amount of legal reserve equals the Bank's paid-in-capital. The legal reserve may be used to offset deficit. If the Bank has no deficit and the legal reserve has exceeded 25% of its paid-in capital, the excess may be transferred to capital or distributed in cash. In addition, based on the Banking Act, if the legal reserve is less than the Bank's paid-in capital, the amount that may be distributed in cash should not exceed 15% of the Bank's paid-in-capital. In the event that the accumulated legal reserve equals or exceeds the Bank's paid-in capital or the Bank is sound in both its finance and business operations and had already set aside a legal reserve in compliance with the Banking Act, the restrictions stipulated above shall not apply.

#### d. Special reserve

	September 30, 2023	December 31, 2022	September 30, 2022	
The debit balance of other equity	\$ 14,574,995	\$ -	\$ -

	<u>\$ 16,832,170</u>	\$ 2,077,665	<u>\$ 2,077,665</u>	

According to Rule No. 1090150022 issued by the FSC and the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs," the Bank should appropriate to or reverse from its special reserve certain specified amounts. Any special reserve appropriated may be reversed to the extent that the net debit balance reverses, and thereafter distributed.

According to Rule No. 10901500221 issued by the FSC, on the first-time adoption of the fair value model for investment properties, the Bank should appropriate as special reserve an amount equivalent to the amount of the net increase in fair value transferred to retained earnings. In the subsequent fair value measurement of investment properties, the incremental fair value of investment properties is recognized in profit or loss and the same amount is appropriated from retained earnings to the special reserve. For any subsequent reversal of the accumulated incremental fair value of investment properties upon disposal of investment properties, the reversed amount can be distributed accordingly.

According to Rule No. 10510001510 issued by the FSC, the Bank should appropriate between 0.5% and 1% of net income after tax to the special reserve during the appropriation of earnings from 2016 through 2018. Since 2017, the Company is allowed to reverse special reserve at the amount of the costs of employee transfer and arrangement in connection with the development of financial technology.

According to Rule issued by the FSC, the Bank transferred the trading loss reserve as of December 31, 2010 to the special reserve and the special reserve may not be used unless it reaches the matters specified by the authority to reversal.

## e. Retained earnings and dividends policy

According to the Bank's Articles of Incorporation, if the Bank made a profit in a fiscal year, the profit shall be first utilized for paying taxes and offsetting deficits of prior years, if any. If the legal reserve is less than the paid-in capital, profit shall be appropriated to legal reserve and special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Bank's board of directors as the basis for proposing a plan for the distribution of dividends and bonuses to shareholders, which should be resolved by the shareholders.

In consideration of the competitive environment, business growth, and capital adequacy, the Bank adopts a residual dividend policy. According to the Bank's business plan, except for a necessary amount of earnings to be reserved for dividend distribution, the remainder shall be distributed as cash dividends in principle. However, the maximum cash dividend may not exceed the regulatory limit.

The appropriations of earnings for 2022 and 2021 which were approved by the Bank's board of directors on behalf of the shareholders in accordance with the Company Act on April 27, 2023 and May 4, 2022, respectively, were as follows:

	A	Appropriation of Earnings			Dividends Per Share (NTS

## 39. EMPLOYEE BENEFITS EXPENSES

	Fo	For the Three Months Ended September 30			For the Nine Months Ended September 30			
		2023		2022		2023		2022
Salaries Insurance Post-employment benefits Remuneration of directors Others	\$	4,772,160 343,596 207,202 819 126,975	\$	4,200,727 308,227 174,429 1,093 74,190	\$	14,052,168 1,013,296 606,589 2,690 297,059	\$	12,438,938 924,030 518,657 3,375 235,164
	<u>\$</u>	5,450,752	\$	4,758,666	\$	15,971,802	<u>\$</u>	14,120,164

For the nine months ended September 30, 2023 and 2022, the average number of the Company's employees was 12,768 and 12,257, including 19 and 20 non-executive directors, respectively.

As of September 30, 2023 and 2022, the number of employees of the Company was 12,976 and 12,393, respectively.

Under the Articles of Incorporation of the Bank, the Bank accrued compensation of employees and remuneration of directors at the rates of 0.05% and no higher than 0.1%, respectively, of net profit before income tax, compensation of employees, and remuneration of directors (after offsetting accumulated deficits). For the nine months ended September 30, 2023 and 2022, compensation of employees and the remuneration of directors were as follows:

		Months Ended nber 30	For the Nine Months Ended September 30			
	2023	2022	2023	2022		
Compensation of employees Remuneration of directors	\$ 4,000 \$ 819	\$ 4,000 \$ 1,093	\$ 11,000 \$ 2,690	\$ 12,000 \$ 3,375		

If there is a change in the amounts after the annual consolidated financial statements were authorized for issue, the differences are recorded in the next fiscal year as a change in the accounting estimate.

Compensation of employees and the remuneration of directors for the years ended December 31, 2022 and 2021 which have been approved by the Bank's board of directors on March 9, 2023 and March 11, 2022, respectively, were as follows:

	For the Year End	led December 31
	2022	2021
Compensation of employees Remuneration of directors	\$ 15,400 \$ 5,400	\$ 13,368 \$ 6,000

There was no difference between the actual amounts of compensation of employees and remuneration of directors paid and the amounts recognized in the consolidated financial statements for the years ended December 31, 2022 and 2021, respectively.

Information on the compensation of employees and remuneration of directors resolved by the Company's board of directors in 2023 and 2022 is available at the Market Observation Post System website of the Taiwan Stock Exchange.

#### 42. INCOME TAX

a. Income tax recognized in profit or loss

Main components of income tax expense were as follows:

	For the Three Septem		For the Nine Months Ende September 30			
	2023	2022	2023	2022		
Current tax						
In respect of the period	\$ 1,011,285	\$ 1,206,226	\$ 4,952,745	\$ 3,578,101		
Adjustments for prior year	-	-	28,770	2,456		
Deferred tax						
In respect of the period	706,715	256,774	428,485	453,443		
Income tax of overseas						
subsidiaries	<u>(611</u> )	67,568	160,367	278,004		
Income tax expense recognized						
in profit or loss	<u>\$ 1,717,389</u>	<u>\$ 1,530,568</u>	<u>\$ 5,570,367</u>	<u>\$ 4,312,004</u>		

According to the Ministry of Finance's Taiwan Finance Tax No. 910458039, "The joint declaration of business income tax by profit-seeking enterprises in accordance with Article 49 of the Financial Holding Company Act and Article 40 of the Business Mergers and Acquisitions Act" released on February 12, 2003, where a Financial Holding Company holds more than or equal to 90% of the outstanding issued shares of a domestic subsidiary, and the period of shareholdings in the subsidiary has reached 12 months of the tax year, the Financial Holding Company may elect to be the taxpayer and jointly declare profit-seeking enterprise tax. The Bank elected to jointly declare the profit-seeking enterprise income tax since 2003 and the undistributed retained earnings since 2002 with its parent company Cathay Financial Holding Co., Ltd. and its subsidiaries. Additional tax payable or receivable due to the joint declaration of income tax is recognized under the receivables (payables) for allocation of integrated income tax systems account.

## b. Income tax recognized in other comprehensive income

	For the S	Three M Septemb		nded	For	the Nine N Septem

#### c. Income tax assessments

The Bank's income tax returns through 2017 have been assessed by the tax authority; however, the Bank was dissatisfied and invoked the administrative remedy for fiscal years 2015 to 2017. The Bank assessed relevant income tax based on prudence principle.

## 43. EARNINGS PER SHARE

The numerator and denominator used in calculating earnings per share were adjusted retroactively as follows:

**Unit: Dollar Per Share** 

		Months Ended nber 30	For the Nine Months End September 30			
	2023	2022	2023	2022		
Basic earnings per share	<u>\$ 0.73</u>	<u>\$ 0.68</u>	<u>\$ 2.33</u>	<u>\$ 1.90</u>		

The number of shares outstanding was retrospectively adjusted to reflect the effects of the stock dividends distributed in the year following earnings appropriation. The earnings and weighted average number of ordinary shares outstanding used in the computation of earnings per share were retrospectively adjusted as follows:

## Net income

	2 02 0220 222200	Months Ended aber 30	For the Nine Months Ended September 30			
	2023	2022	2023	2022

2) As of September 30, 2023, the Bank's significant lawsuits and proceedings arising due to normal business relationships are as follows:

Lee & Li, Attorneys-at-Law and SanDisk Corporation of USA alleged that the embezzlement case of Liu Wei-Chieh (an employee of Lee & Li), which occurred in October 2003 was caused by the negligence of the Bank in its operation, and the plaintiffs claimed damages from the Bank in the amount of approximately \$991,002 thousand. The case has been pending in the court since July 2007, and the Bank won favorable decisions in both the first and second instances. Although the Supreme Court reversed the original second-instance judgments, the Bank again won a favorable decision in the second instance on August 25, 2021. Lee & Li is appealing to the Supreme Court currently. Both the Bank and its attorneys hold that this case will not have a material adverse effect on the financial position of the Bank.

As of September 30, 2023, December 31, 2022 and September 30, 2022, the trust assets (liabilities) were in the amount of \$726,993,843 thousand, \$659,036,645 thousand and \$634,656,667 thousand, respectively.

# 48. IMPLEMENTATION OF CROSS-SELLING MARKETING STRATEGIES BETWEEN THE BANK, CATHAY FINANCIAL HOLDING CO., LTD., AND ITS SUBSIDIARIES

The Bank has entered into cross-selling marketing contracts with Cathay Life Insurance Co., Ltd., Cathay Century Insurance Co., Ltd. and Cathay Securities Co., Ltd. The contracts cover joint use of operation sites and facilities as well as cross-selling marketing personnel.

The Bank has entered into cooperation contracts with Cathay Financial Holding Co., Ltd., Cathay Life Insurance Co., Ltd., Cathay Century Insurance Co., Ltd., and Cathay Securities Co., Ltd. for the joint use of information equipment and the development, operation, maintenance and management of information systems.

The related expenses are allocated to each subsidiary directly by the business nature or to the cooperating companies by other reasonable methods.

## 49. FINANCIAL INSTRUMENTS

## a. Information on fair value hierarchy

Fair value is the price that a market participant can receive from selling an asset or pay for settling a liability in an orderly transaction on a measurement date.

Financial instruments are accounted for at fair value on original recognition, and in many cases, usually refers to the transaction price. On subsequent measurement, except for some financial instruments that are measured at amortised cost, they are measured at fair value. The best evidence of fair value is the open quotation in an active market. If there is no active market for the financial instruments, the Bank uses an evaluation model or refers to Bloomberg, Reuters or counterparty quotes to measure the fair value of financial instruments.

## b. The definitions of each level of the fair value hierarchy are shown below:

# 1) Level 1

Level 1 financial instruments are traded in an active market in which there are quoted prices for identical assets and liabilities. An active market has the following characteristics:

- a) All financial instruments in the market are homogeneous.
- b) There are willing buyers and sellers in the market all the time.
- c) The public can access the price information easily.

The products in this level, such as listed stock and beneficiary securities, usually have high liquidity or are traded in the exchanges.

## 2) Level 2

The products in this level have fair values that can be inferred either directly or indirectly through observable inputs other than quoted prices in an active market. The observable inputs are as follows:

- a) Quoted prices of similar products in an active market. This means the fair value can be derived from the current trading prices of similar products, and whether they are similar products should be judged on the characteristics and trading rules. The fair price valuation in this circumstance may be adjusted due to time differences, trading rule differences, transaction prices involving related parties, and the correlation of price between the product itself and similar goods;
- b) Quoted prices for identical or similar financial instruments in inactive markets;
- c) For the marking-to-model method, the inputs to the model should be observable (such as interest rates, yield curves and volatilities). The observable inputs mean that they can be obtained from the market and can reflect the expectation of market participants;
- d) Inputs that are derived from observable market data through correlation or other means.

The fair values of products categorized in this level are usually calculated using a valuation model generally accepted by the market; such products are forward contracts, cross-currency swap contracts, simple interest bearing bonds, asset swaps and commercial papers.

## 3) Level 3

The fair values of the products in this level are typically based on management assumptions or expectations other than the direct market data. For example, historical volatility used in valuing options is an unobservable input because it cannot represent the entire market participants' expectation on future volatility.

The products in this level are part of emerging stocks, unlisted shares, complex derivative financial instruments or products with prices that are provided by brokers, such as complex foreign exchange options.

- c. Measured at fair value on a recurring basis
  - 1) The fair value hierarchies of the Company's financial instruments, which are measured at fair value on a recurring basis, were as follows:

	September 30, 2023

#### 2) Financial instruments measured at fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between willing market participants with full understanding of the sale or transfer transaction. The fair values of financial instruments at fair value through profit or loss, financial assets at fair value through other comprehensive income and hedging derivative financial instruments with quoted prices in an active market are based on their market prices; financial instruments with no quoted prices in an active market are estimated by valuation methods.

# a) Marking to market

This method should be considered first when determining fair value. The following are the principles to follow when marking to market:

- i. Ensure the consistency and integrity of market data.
- ii. Market data should be obtained from publicly available, easily accessible and independent sources.
- iii. Listed securities with tradable prices should be valued at closing prices.
- iv. Evaluation of unlisted securities that lack tradable closing prices should use quoted prices from independent brokers and comply with the rules issued by the authorities.

## b) Marking to model

The use of marking to model is suggested if marking to market is infeasible. This valuation method is based upon model inputs that are used to derive the value of the trading positions. The Bank uses the same estimations and assumptions as those used by market participants to determine the fair value.

The Company uses the forward rates provided by Reuters to estimate the fair values of foreign exchange forward contracts, interest rate swap contracts and cross-currency swap contracts and the discounted cash flow method to calculate the fair value of each contract. For foreign exchange option transactions, the Company uses the option pricing models which are generally used by other market participants (e.g., the Black-Scholes model) to calculate the fair value of the contract.

# 3) Fair value adjustments

## Credit risk valuation adjustments

Credit risk valuation adjustments refer to the fair value of the Over The Counter (OTC) derivative financial instrument contracts, which also reflects the credit risk of both parties, and can be mainly divided into "credit value adjustments" and "debit value adjustments":

- a) Credit value adjustments (CVA): Adjustment to a transaction in a non-concentrated trading market, that is, the adjustment of a derivative contract evaluation in the OTC transaction, which reflects the possibility that the Company may not be able to collect the full market value or the counterparty may default on the repayment of the fair value.
- b) Debit value adjustments (DVA): Adjustment to a transaction in a non-concentrated trading market, that is, the adjustment of a derivative contract evaluation in the OTC transaction, which reflects the possibility that the Company may not be able to pay the full market value or the Company may default on the repayment of the fair value.

Both CVA and DVA are concepts of estimated loss, calculated as the probability of default (PD) multiplied by the loss given default (LGD) and multiplied by the exposure at default (EAD).

The Bank uses the fair value of OTC derivatives to calculate the amount of exposure at default (EAD).

The Company uses 60% as the loss given default based on the recommendation of "IFRS 13 CVA and DVA Related Disclosure Guidelines" of the stock exchange. The Company may use other loss given default assumptions based on the nature of risk and available figures.

The Company incorporates the credit risk assessment adjustment into the fair value calculation of financial instruments to reflect the counterparty's credit risk and the Company's credit quality.

# 4) Transfers between Level 1 and Level 2 during the period

Except for the active market adjustments of some bond prices, there were no significant transfers between Level 1 and Level 2 for the nine months ended September 30, 2023 and 2022.

## 5) Reconciliation of Level 3 fair value measurements

a) Reconciliation of Level 3 fair value measurements of financial assets

# For the nine months ended September 30, 2023

		Valuation G	ains (Losses)	Amount o	of Increase	Amount o	f Decrease

Financial liabilities at fair value through profit or loss								
Derivative financial liabilities	\$ 4,365,620	\$ 1,774,231	\$ -	\$ 68,922	\$ -	\$ 127,348	\$ -	\$ 6,081,425

Total gains or losses shown in the tables above that contain unrealized gains and losses related to liabilities committed as of September 30, 2023 and 2022 amounted to losses of \$391,596 thousand and \$1,623,750 thousand, respectively.

# 6) Quantitative Information on significant unobservable inputs for Level 3 fair value measurements

Description of significant unobservable inputs used in the valuation of recurring fair value measurements categorized within Level 3 of the fair value hierarchy was as follows:

# September 30, 2023

Items	Products	Fair Value	Valuation Techniques	Significant Unobservable Inputs	Interval (Weighted Average)	Relationship between Inputs and Fair Value
Measured at fair value on						
a recurring basis						
Financial assets						
Financial assets at fair value through profit or loss	Stock	\$ 26,149	Market approach	Discount for lack of marketability	10%-20%	The higher the discount for lack of marketability, the lower the fair value of the stock
Financial assets at fair value through other comprehensive income	Stock	7,229,567	Market approach	Discount for lack of marketability	15%-30%	The higher the discount for lack of marketability, the lower the fair value of the stock
		84,340	Income approach	Cost of equity rate	15%-20%	The higher the cost of equity rate, the lower the fair value of the stock
		913,289	Value of net assets	Value of net assets	Not applicable	The higher the value of net assets, the higher the fair value of the stock
			approach			

# December 31, 2022

# 7) Valuation process used for fair value measurements categorized within Level 3 of the fair value hierarchy

The Company's risk management department is responsible for validating the fair value measurements and ensuring that the results of the valuation are in line with market conditions, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. The department analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies at each reporting date.

# d. Financial instruments that were not measured at fair value

## 1) Information on fair value

Except as detailed in the following table, the management considers the carrying amounts of financial assets and financial liabilities recognized in the consolidated financial statements as approximate fair values or that the fair values cannot be reasonably measured.

	September	30, 2023	December	31, 2022	September 30, 2022	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets						
Investments in debt instruments at amortised cost	\$ 564,832,476	\$ 528,654,629	\$ 516,862,982	\$ 489,173,287	\$ 478,575,106	\$ 447,966,672

## 2) Information on fair value hierarchy

Itom	September 30, 2023							
Item	Total	Level 1	Level 2	Level 3				
Financial assets								
Investments in debt instruments at amortised cost	\$ 528,654,629	\$ 42,883,739	\$ 485,357,078	\$ 413,812				

Itom	December 31, 2022						
Item	Total	Level 1	Level 2	Level 3			
Financial assets							
Investments in debt instruments at amortised cost	\$ 489,173,287	\$ 36,153,010	\$ 452,536,173	\$ 484,104			

Itom	September 30, 2022							
Item	Total		Level 1	Level 2	2 Level			
Financial assets								
Investments in debt instruments at amortised cost	\$ 447,966,672	\$	30,807,866	\$ 413,922,540	\$	3,236,266		

# 3) Valuation techniques

The methods and assumptions used by the Company to estimate the values of financial instruments that are not measured at fair value are as follows:

- a) Cash and cash equivalents, due from the Central Bank and call loans to other banks, securities purchased under resell agreements, receivables, other financial assets, due to the Central Bank and other banks, call loans from the Central Bank and other banks, securities sold under repurchase agreements, payables, deposits and remittances whose maturity date is very near or the future payment price approximates the carrying amount take the amount in the book on the balance sheet date as the fair value.
- b) Discounts and loans, deposits, financial debentures and structured commodity principals are all interest-bearing financial assets/liabilities whose carrying amount is taken as the current fair value. The carrying amount of nonperforming loan is the estimated recoverable amount after deduction of allowance for impairment loss, hence its carrying amount is used as its fair value.
- c) If an investment in a debt instrument at amortised cost has a public quoted price in an active market, the market price is used as its fair value; if no market price is available for reference, a valuation method is used to estimate the fair value. The estimates and assumptions used by the Bank in the valuation method are consistent with the information and assumptions used by market participants in the estimation of the fair value of financial products.

#### **50. FINANCIAL RISK MANAGEMENT**

The Bank's risk control and hedging strategy follows the requirements of the customer service-oriented banking industry and regulatory environment. In order to comply with the above requirements, the Bank adopts different risk management methods to identify its risks and the Bank follows the spirit and regulation of the "Basel Accord" to keep strengthening its assets and the practices of capital management to maintain the best capital adequacy ratio.

The Bank has set up its risk management committee, whose responsibilities are as follows:

- a. To amend the risk management policies, risk appetite or risk tolerance and report the above issues to the board of directors for approval;
- b. To manage and decide the strategy about the Bank's credit risk, market risk and operational risk;

- c. To report the significant risk management issues, such as credit ratings, market assessment and risk indicators;
- d. To analyze the issues that the Bank's business unit brought up for discussion;
- e. Other issues.

The Bank organized a Risk Management segment to monitor, lead, develop, and establish the integral risk management framework.

#### a. Credit risk

Credit risk represents the risk of loss that the Bank would incur if a counterparty fails to perform its contractual obligations. Sources of credit risk cover both on-and off-balance sheet accounts.

## The Bank, Indovina Bank and CUBCN Bank

The approval unit of Cathay United Bank, Indovina Bank and CUBCN Bank's credit risk strategies and significant risk policies is the board of directors. Cathay United Bank's Risk Management Segment and its subdivisions assist in reviewing and monitoring risk tolerance ability and risk control procedures, and establish credit approval processes, credit limit management, credit rating information, collateral information, periodic reviews and remedial management systems. The subdivisions include the Market Risk Management Department, Credit and operational Management Department, Consumer Credit Risk Management Department, and International Credit Risk Management Department. Indovina Bank established the credit risk management department to perform risk management. The credit risk departments for loans, investments, and financial instruments or contracts are the executive unit of credit risk control. The credit quality of the Company is strictly controlled in advance. After the loan is approved, lending portfolios are reviewed according to the Bank and Indovina Bank's loan review regulations and deficiencies are tracked to strengthen post-event risk management.

The Bank, Indovina Bank and CUBCN Bank maintain a strict policy to evaluate customers' credit ratings when providing loans, loan commitments and commercial letters of credit. Certain customers are required to provide appropriate collateral for the related loans, and the Bank, Indovina Bank and CUBCN Bank retain the legal right to foreclose or liquidate the collateral, which effectively reduces the credit risk of the Bank, Indovina Bank and CUBCN Bank.

# **CUBC Bank**

The approval unit of CUBC Bank's credit risk policies is the board of directors, and the policies are then implemented by the CUBC Bank's credit risk management department. These credit risk policies form the basic principles for all credit risk situations faced by CUBC Bank and also serve as the basis for the development of CUBC Bank's various businesses in Cambodia.

When CUBC Bank provides loans, the approval unit is decided based on credit amount. The loan committee is the top lending authority within CUBC Bank, and is composed of CUBC Bank's senior management. It is in charge of approval of all credit in excess of CUBC Bank's lending authorities. Certain customers are required to provide appropriate collateral for the related loans, and CUBC Bank retains the legal right to foreclose or liquidate the collateral, which effectively reduces Cathay United Bank's credit risk. The disclosure of the maximum credit exposure does not take into account any collateral held or other enhancements.

## Judgment of significant increase in credit risk after initial recognition

## The Bank

The Bank assesses the movements in default risk during the expected lifetime of various types of credit assets at each reporting date to determine if the credit risk has increased significantly since the initial recognition. For the assessment, the Bank considers reasonable and corroborative information (including prospective information) that indicates a significant increase in credit risk since initial recognition. The key indicators for consideration include:

## 1) Quantitative indicators

# a) Changes in credit rating

When the credit rating at the reporting date has decreased to some extent compared with that on initial recognition, credit risk is deemed to have increased significantly since initial recognition.

## b) Information on the overdue status of a contract

When the contract payment is overdue for 30 days to 90 days at the reporting date, credit risk is deemed to have increased significantly since initial recognition.

## 2) Qualitative indicators

When the information observed at the reporting date meets the following conditions, credit risk is deemed to have increased significantly since initial recognition.

- a) Bounced checks are reported.
- b) Auditors have expressed significant doubt on the entity's ability to continue as a going concern.
- c) Auditors' opinion adverse opinion.
- d) Auditors' opinion disclaimer of opinion.
- e) The stock was placed in full-cash delivery stock.
- f) Other changes in the internal or external information on judging the credit quality changes.

The Bank established Stage 1 and Stage 2 for debt instruments based on bonds ratings. Bonds rated above investment grades are classified as low credit risks. Credit risks are deemed to have significantly increased if credit ratings decreased over specific level after initial recognition date.

#### **CUBCN Bank**

CUBCN Bank assesses the movements in default risk during the expected lifetime of various types of credit assets at each reporting date to determine if the credit risk has increased significantly since the initial recognition. For the assessment, CUBCN Bank considers reasonable and corroborative information (including prospective information) that indicates a significant increase in credit risk since initial recognition. The key indicators for consideration include:

## 1) Quantitative indicators

## a) Changes in credit rating

When the credit rating at the reporting date has decreased to some extent compared with that on initial recognition, credit risk is deemed to have increased significantly since initial recognition.

## b) Information on the overdue status of a contract

When the contract payment is overdue for less than 90 days at the reporting date, credit risk is deemed to have increased significantly since initial recognition.

## 2) Qualitative indicators

When the information observed at the reporting date meets the following conditions, credit risk is deemed to have increased significantly since initial recognition.

- a) Any financial instruments are classified as special mention.
- b) Other changes in the internal or external information on judging the credit quality changes.

### Indovina Bank

Indovina Bank assesses the movement in default risk during the expected lifetime of various types of financial assets at each reporting date to determine if credit risk has increased significantly since initial recognition:

## 1) Quantitative indicators

## a) Changes in credit rating

When the credit rating at the reporting date has decreased to some extent compared with that on initial recognition, credit risk is deemed to have increased significantly since initial recognition.

## b) Low credit risk criteria

An exposure rated below Moody's investment grade (i.e., the credit rating is lower than the credit rating Baa3 of Moody's, an international credit rating agency) at the reporting date would be classified as a significant increase in credit risk since initial recognition.

## c) Information on the overdue status of a contract

When the contract payment is overdue for 30 days at the reporting date, credit risk is deemed to have increased significantly since initial recognition.

#### d) Internal credit assessment indicators

For financial assets whose internal credit assessment indicators show a weaker credit quality compared to that upon initial recognition, credit risk is deemed to have increased significantly since initial recognition.

## 2) Qualitative indicators

- a) Bounced checks are reported.
- b) Auditors have expressed significant doubt on the entity's ability to continue as a going concern.
- c) Other changes in the internal or external information on judging the credit quality changes.

#### **CUBC** Bank

CUBC Bank assesses if the credit risk of financial assets at each reporting date has increased significantly since initial recognition based on the following indicators:

## 1) Information on the overdue status of a contract

When the contract payment is overdue for more than 15 days for short-term loans or more than 30 days for long-term loans at the reporting date, credit risk is deemed to have increased significantly since initial recognition.

### 2) Loan classification from National Bank of Cambodia

A loan contract with special mention position at the reporting date would be classified as a loan with significant increase in credit risk since initial recognition.

## 3) Internal credit assessment indicators

For financial assets whose internal credit assessment indicators show a weaker credit quality compared to that upon initial recognition, credit risk is deemed to have increased significantly since initial recognition.

## Default and credit impairment of financial asset

# The Bank

The Bank's criteria for determining that a financial asset is in default are the same for evaluating credit impairment of financial assets. Where one or more of the following conditions are met, the Bank determines the financial assets to be subject to default and credit impairment.

## 1) Quantitative indicator

# a) Changes in credit rating

When the credit rating at the reporting date fell into the default level, it is determined as credit impairment.

# b) Information on the overdue status of a contract

When the contract payment was overdue for more than 90 days at the reporting date, it is determined as credit impairment. Debt instruments that do not pay principal and interest according to issuance or transaction condition are determined to be credit-impaired.

#### 2) Qualitative indicator

When the information observed at the reporting date indicates the following conditions, it is determined as credit impairment.

- a) Bailout, reorganization, individual agreement due to debtor's financial difficulties;
- b) Lawsuit action has been taken;
- c) Debt settlement, debt negotiation;
- d) Other internal or external information on judging the deterioration in credit quality.

The aforementioned definition of default and credit impairment applies to all financial assets held by the Bank, and is consistent with the definition applied on the significant financial assets for the purpose of internal credit risk management, and is also applied in the relevant impairment assessment model.

#### **CUBCN Bank**

CUBCN Bank's criteria for determining that a financial asset is in default are the same for evaluating credit impairment of financial assets. Where one or more of the following conditions are met, CUBCN Bank determines the financial assets to be subject to default and credit impairment.

#### 1) Quantitative indicator

a) Changes in credit rating

When the credit rating at the reporting date fell into the default level, it is determined as credit impairment.

b) Information on the overdue status of a contract

When the contract payment was overdue for more than 90 days at the reporting date, it is determined as credit impairment.

## 2) Qualitative indicator

When the information observed at the reporting date indicates the following conditions, it is determined as credit impairment.

- a) Any financial instruments are classified as substandard, doubtful or loss.
- b) The lowest credit risk is classified as substandard, doubtful or loss.
- c) Other internal rating is determined to have fallen into default level.

The aforementioned definition of default and credit impairment applies to all financial assets held by CUBCN Bank, and is consistent with the definition applied on the relevant financial assets for the purpose of internal credit risk management, and is also applied in the relevant impairment assessment model.

## Indovina Bank

Indovina Bank assesses the following indicators at each reporting date to determine if the financial assets are credit-impaired:

## 1) Quantitative indicator

## a) Changes in credit rating

When the credit rating at the reporting date fell into the default level, it is determined as credit impairment.

## b) Information on the overdue status of a contract

When the contract payment was overdue for more than 90 days at the reporting date, it is determined as credit impairment.

# 2) Qualitative indicator

- a) Bailout, reorganization, individual agreement due to debtor's financial difficulties;
- b) Lawsuit action has been taken;
- c) Debt settlement, debt negotiation;
- d) The debtor has filed for bankruptcy or may apply for bankruptcy or reorganization;
- e) Principal or interest could not be paid as scheduled during the settlement period;
- f) Other internal or external information on judging the deterioration in credit quality.

## **CUBC Bank**

CUBC Bank assesses the following indicators at each reporting date to determine if the financial assets are credit-impaired:

## 1) Information on the overdue status of a contract

When the contract payment is overdue for more than 30 days for short-term loans or more than 90 days for long-term loans at the reporting date, it is determined as credit impairment.

## 2) Loan classification from National Bank of Cambodia

A loan contract with specific position, such as substandard, doubtful and loss, at reporting date would be classified as a credit-impaired loan.

## 3) Internal credit assessment indicators

The credit information used for internal credit risk management purpose that indicated credit deterioration at the reporting date would be recognized as credit-impaired assets.

## Measurement of expected credit loss

# The Bank

For the purpose of assessing the expected credit losses, the Bank classifies the credit assets into the following groups based on credit category, credit rating, risk characteristics, enterprise size, product category, and so on.

Credit Category	Definition
Enterprise loan	Grouped by risk characteristics, enterprise size and internal credit rating
Consumer loan	Grouped by product category and internal credit rating
Credit Card	Grouped by product category and internal credit rating

When the credit risk of the financial instrument has not increased significantly after the initial recognition (Stage 1), the Bank will measure the allowance for losses at the 12-month expected credit losses. When the credit risk of the financial instrument has increased significantly (Stage 2) or credit impairment has existed (Stage 3) after the initial recognition, the Bank will measure the allowance for losses at the lifetime expected credit losses.

For the measurement of the expected credit losses (ECL), the Bank calculates the 12-month ECL and lifetime ECL by multiplying three factors, i.e., probability of default (PD), loss given default (LGD) and exposure at default (EAD) of the borrower over the next 12 months and the lifetime.

The PD and LGD applied in the impairment assessment of the credit business of the Bank is adjusted and calculated based on the internal information of each group of assets as well as the currently observable data and the forward-looking macroeconomic information (such as economic growth rate, etc.).

The Bank assesses the EAD of loan at the reporting date. According to internal and external information, the Bank considers the portion of the loan commitment that is expected to be drawn within 12 months after the reporting date and for the lifetime, to determine the EAD for calculating the expected credit losses.

The Bank performs impairment assessment of debt instruments measured at FVTOCI and those measured at amortised cost in accordance with related requirements:

- 1) The EAD is measured at the amortised cost of a financial asset plus its interest receivable.
- 2) The PD is based on the information regularly published by Moody's, and calculated on the basis of the adjusted historical data according to the currently observable data and the forward-looking macroeconomic information (e.g., gross domestic product and economic growth rate, etc.).
- 3) The LGD is selected according to the type of debt instruments based on the information regularly published by Moody's.

#### **CUBCN Bank**

For the purpose of assessing the expected credit losses, CUBCN Bank classifies the credit assets into the following groups based on business category and forward-looking model:

1) CUBCN Bank classifies the credit assets into the following groups based on the assessment method and business category:

Credit Category	Definition
Loan activities and interbank	Grouped by product category and internal/external credit rating
borrowing business	
Bills forfaiting business	Grouped by product category and internal/external credit rating
Off-balance sheet credit business	Grouped by product category and internal/external credit rating
Bond business and interbank	Grouped by product category and internal/external credit rating
deposit business	
Due from banks, call loan to	Grouped by product category and internal/external credit rating
banks business, and reverse	
repurchase	
Other receivables	Grouped by product category and internal/external credit rating

- 2) CUBCN Bank grouped the non-retail business risk group according to the forward-looking model.
  - a) The expected credit losses of financial instruments are measured on a case-by-case basis as follows:
    - i. For financial instruments in Stage 1, the allowance for losses is measured by the 12-month expected credit losses.
    - ii. For financial instruments in Stage 2, the allowance for losses is measured by the lifetime expected credit losses.
    - iii. For financial instruments in Stage 3, if the single account loan balance exceeds a certain amount, the discounted cash flow method can be used for individual assessment; if not using individual assessment, the allowance for losses is measured by the lifetime expected credit losses, and the PD is 100%.
  - b) The expected credit loss parameters of financial instruments are calculated according to the following principles respectively:
    - i. The PD is based on the information regularly published by Moody's, and calculated on the basis of the historical data which is adjusted according to the currently observable data and the forward-looking macroeconomic information.
    - ii. The LGD is based on the LGD regulated in the Capital of Commercial Banks (for trial implementation) published by the China banking supervisory authority as the reference for evaluation.
    - iii. The EAD is measured at current exposure method. Besides, off-balance sheet credit businesses also convert exposure using the credit conversion factor regulated in the Capital of Commercial Banks (for trial implementation) published by China banking supervisory authority.

#### Indovina Bank

For the purpose of assessing the expected credit losses, Indovina Bank classifies the financial assets into the following groups based on credit category, credit rating, risk characteristics, enterprise size, product category, counterparty type, and so on.

Category	Definition
Loan portfolio	Grouped by counterparty type and enterprise size
Bond portfolio	Grouped by product category, external credit rating and payment ranks
Cash equivalents, due from	Grouped by counterparty type
and call loans to banks	

## 1) Loan portfolio

The segmentation of Indovina Bank's loan portfolio is based on its risk characteristics, such as product class, counterparty type and enterprise size. The measurement of expected credit loss is estimated by three main parameters: Probability of default, loss given default and exposure at default. The probability of default (PD) and loss given default (LGD) were built using the Bank's historical delinquent information and recovery data and calibrated with selected macroeconomic factors for forward-looking adjustment. The estimated amounts of exposure at default were calculated by the amortised cost and interest receivable. At each financial reporting date, if the above criteria for a significant increase in credit risk since initial recognition are not met, the allowance loss shall be measured on the basis of the 12-month expected credit loss method. If financial assets meet the conditions of significant increases in credit risk or credit deterioration since initial recognition, the allowance losses shall be estimated according to the lifetime expected credit loss method.

# 2) Bond portfolio

The segmentation of Indovina Bank's bond portfolio is based on its product class, external rating and payment rank. The measurement of expected credit loss is based on three main parameters: Probability of default, loss given default and exposure at default. The probability of default and loss given default were built using external information with sufficient historical default data and recovery rates and calibrated with selected macroeconomic factors for forward-looking adjustment. The estimated amounts of exposure at default were calculated by the amortised cost and interest receivable. At each financial reporting date, if the above criteria for a significant increase in credit risk since initial recognition are not met, the allowance loss shall be measured on the basis of the 12-month expected credit loss method. If financial assets meet the conditions of significant increases in credit risk or credit deterioration since initial recognition, the allowance losses shall be estimated according to the lifetime expected credit loss method.

## 3) Cash equivalents, due from and call loans to banks

The segmentation of Indovina Bank's cash equivalents, due from and call loans to banks, is based on its counterparty type. The measurement of expected credit loss is estimated by three main parameters: Probability of default, loss given default and exposure at default. The probability of default is calculated using Sovereign PD. The loss given default is determined by the foundation approach in Basel II. The estimated amounts of exposure at default were calculated by the amortised cost and interest receivable. At each financial reporting date, if the above criteria for a significant increase in credit risk since initial recognition are not met, the allowance loss shall be measured on the basis of the 12-month expected credit loss method. If financial assets meet the conditions of significant increases in credit risk or credit deterioration since initial recognition, the allowance losses shall be estimated according to the lifetime expected credit loss method.

## **CUBC** Bank

CUBC Bank has grouped its exposures on the basis of shared credit risk characteristic, including product category and counterparty type as follows:

Category	Definition
Loan	Grouped by product characteristics, industry and counterparty type
Credit Card	Grouped by product characteristics

The measurement of expected credit loss of CUBC Bank's loan portfolio is based on its credit category, counterparty type and product category. The probabilities of default and loss given default were built by the internal and external historical delinquent information, LGD supervised under Basel II and calibrated by selected macroeconomic factors for forward-looking adjustment. The estimated amounts of exposure at default were calculated by the amortised cost and interest receivable. At each financial reporting date, if the above criteria for a significant increase in credit risk since initial recognition are not met, the loss allowance shall be measured on the basis of the 12-month expected credit loss method. If financial assets meet the foregoing conditions of significant increases in credit risk or credit deterioration since initial recognition, the loss allowance shall be estimated according to the respective methods on the basis of lifetime expected credit losses.

# Write-off policy

The Company writes off the financial assets partially or entirely to the extent of the amount which cannot be reasonably expected to be recovered.

The indicators for reasonably expected to be unrecoverable include:

- 1) The recourse procedure has ceased.
- 2) The debtor's assets or income are evaluated to be insufficient to repay outstanding payments.

Financial asset which has been written off can do the recovery of debt and institute legal proceedings continuously under related policies.

#### Consideration of forward-looking information

#### The Bank

The Bank uses historical data to analyze and identify the significant economic factors that affect the credit risks and expected credit losses of each group of assets, and uses the regression model to estimate the impairment parameter after the prospective adjustment. The significant economic factors and their impact on PD differ depending on the type of financial instruments.

The significant economic factors identified by the Bank as of September 30, 2023 are as follows:

Credit Category	Probability of Default (PD)
Enterprise loan	Proportion of revenue less expenditures from government to GDP % Nominal GDP
Consumer loan	GDP per capita Unemployment rate %
	Price Index
Credit Card	Price Index

## **CUBCN Bank**

CUBCN Bank uses historical data and rate of non-performing banking industry loans issued by the authorities to analyze and identify the significant economic factors that affect the credit risks and expected credit losses of each group of assets, and uses the regression model to estimate the impairment parameter after the prospective adjustment, in order to obtain an unbiased estimate of expected credit losses.

The relevant economic factors identified by CUBCN Bank as of September 30, 2023 include but are not limited to gross domestic product (GDP) published by the National Bureau of Statistics of China and other government authorities, consumer price index (CPI), producer price index (PPI) and supply of currency, etc.

## Indovina Bank

Based on the qualitative and quantitative analysis of historical data, Indovina Bank identifies the local and global economic factors that affect the credit risks and expected credit losses of each group of assets, and uses the regression models, interpolation adjustment, and historical scenario analysis to estimate the impairment parameter after the prospective adjustment. The selected economic factors and their effects on PDs varied from different types of portfolios.

The significant economic factors identified by Indovina Bank as of September 30, 2023 are as follows:

Segment	Selected Factors
Loan portfolio	Vietnam GDP growth rate
Bond portfolio	Global GDP growth rate
	Global inflation index

#### **CUBC** Bank

CUBC Bank establishes ECL model based on historical default and loss data and uses the regression analysis to adjust the forward-looking parameters with local macroeconomic factors by considering local risk distribution and borrowers' characteristics.

The significant economic factors identified by CUBC Bank as of September 30, 2023 are as follows:

Segment	Selected Factors
Loan	Change of GDP (%)
	Change of volume of imports (%)
	Total external debt as percent of GDP (%)
	Change in reserves
Credit Card	Total investment as percent of GDP (%)
	Change of inflation (%)
	Portfolio investment, net
	Change of volume of exports (%)

The valuation techniques or significant assumptions used by the Company for assessing the expected credit losses have no significant change for the nine months ended September 30, 2023.

# Credit risk management policy

The category of credit asset and the grade of credit quality are described as follows:

# 1) Category of credit asset

The credit assets of the Bank are classified into five categories. Normal credit assets are classified as "Category One". The remaining unsound credit assets are evaluated based on the status of the loan collateral and the length of time the asset is overdue. Assets that require special mention are classified as "Category Two", assets that are substandard are classified as "Category Three", assets that are doubtful are classified as "Category Four", and assets for which there is loss are classified as "Category Five". For managing the default credits, the Bank established the regulations governing the procedures to deal with non-performing loans, non-accrual loans and bad debts.

# 2) Grade of credit quality

The Bank sets the grade of credit quality based on the characteristics and scale of the business (such as establishing the internal rating model of credit risk, setting the credit rating table or relevant rules to classify) to proceed with risk management.

In order to measure the credit risk of the clients, the Bank develops the rating model of business credit by employing statistical methods and the professional judgment of the experts, as well as considering the clients' relevant information. The model is reviewed periodically to verify if the calculated results conform to reality and make necessary revisions to the parameters to optimize the results.

With respect to consumer credit assets, such as housing mortgages, credit cards, and small-scale credit loans, the Bank also evaluates the default risk of clients by using the rating scores developed by the Bank.

To ensure the reasonableness of the estimated values of the credit rating system's design, process, and relevant risk factors, the Bank executes the relevant verification and tests the model according to the actual default regularly so that the calculated results will be close to actual default.

The Bank evaluates the counterparties' credit quality before transactions are made and refers to the domestic and foreign credit rating agencies, when rendering different lines of credit based on the credit quality.

# 3) Hedge of credit risk and easing policy

## a) Collateral

The Bank adopts a series of policies to lower the credit risk, and one of the frequently used methods is requesting borrowers to provide collateral. To ensure the creditor's rights, the Bank sets the scope of collateral and the procedures for appraising, managing, and disposing of the collateral. In addition, a credit contract stipulates the bases for credit claims, preservation of collateral, and offset provisions when a credit loss event occurs; the Bank may reduce the limit, cut down the payback period, or deem all debts as due. Also, the Bank may use the deposits that the borrowers saved in the Bank to offset the liabilities to lower the credit risk.

Other non-credit business collateral depends on the characteristics of the financial instruments. Only asset-based securities and other similar financial instruments are secured by an asset pool of financial instruments.

## b) Limit of credit risk and control of credit risk concentration

To avoid the excessive risk concentration, the Bank limits the credit amounts of single counterparties and groups; the Bank also sets the investment guide and regulation of risk control of equity investment to restrict the investment limits of single person (company) or related company (group). Furthermore, the Bank establishes relevant regulations to control the concentration risk of assets, and sets the credit limits by industry, group, country, and stock types to monitor the credit concentration risk.

# c) Net settlement agreement

The Bank usually settles by the gross balance, but signs contract with some counterparties to settle by net balance. If a default happens, the Bank will terminate all transactions with the counterparty and settle by net balance in order to lower the credit risk.

# 4) Maximum exposures to credit risk

Without taking into account the collateral or other credit enhancement instruments, the maximum credit risk exposures of on-balance sheet financial assets equal their carrying amounts. The maximum credit risk exposures of off-balance-sheet items (without considering the collateral or other credit enhancement instruments) are as follows:

# a) The Bank

	Maximum Exposure to Credit Risk					
Off-Balance Sheet Items	September 30,	December 31,	September 30,			
	2023	2022	2022			
Irrevocable loan commitments	\$ 169,631,518	\$ 167,371,093	\$ 171,089,271			
Credit card commitments	772,843,613	805,391,737	794,986,960			
Unused commercial letters of credit	6,821,390	6,869,348	6,564,542			
Guarantees on duties and contracts	20,820,631	19,613,957	19,811,202			

#### b) Indovina Bank

Unused commercial letters of credit		285,840		573,635		520,453		
Irrevocable loan commitments		272,246		262,406		1,042,421		

To reduce the risk from any businesses, the Bank conducts an overall assessment and takes appropriate risk reduction measures before undertaking the business, such as obtaining collateral and guarantors. For obtaining of collateral, the Bank has set Guidelines Governing Collateral to ensure that collateral meets the specific criteria and has the effect of reducing the business risk.

The management deems the Company is able to control and minimize the credit risk exposures in off-balance-sheet items as the Company uses stricter rating procedures when extending credits and conducts reviews regularly.

The carrying amounts of the maximum credit risk exposure of on-balance-sheet items were as follows:

# September 30, 2023

	Stage 1	Stage 2	Stage 3	Differences of

# 5) Credit concentration risk of the Company

When the counterparties are obviously the same party, or there are several counterparties but engaging in similar business activities and sharing similar economic characteristics, and vulnerable to the same economic impacts or other changes, the credit concentration risk is apparent.

Credit concentration risk of the Company derives from the assets, liabilities and off-balance sheet items, and arises from performing obligations or engaging in transactions of cross-credit line portfolio with risk exposures including credit extension, due from and call loans to other banks, securities investment, receivables and derivatives. The Company does not significantly concentrate on a single client or counterparty, and the transaction amount with a single client or counterparty relative to the Company's total bills discounts and loans, including overdue loans, guarantees, bills purchased, and acceptances receivable is not significant. Credit concentration risk of the Company according to industry and geographic region is listed below:

## a) Industry type

	September 30	September 30, 2023		, 2022	<b>September 30, 2022</b>	
Industry Type	Amount	%	Amount	%	Amount	%

# b. Liquidity risk

## 1) Source and definition of liquidity risk

Liquidity risk means the possible losses arising from the failure of the Bank to obtain funds at a reasonable price within a reasonable time to cover the increase in assets or repay-matured liabilities.

## 2) Liquidity risk management strategy and principles

The principle of liquidity risk management strategy of the Company is to stabilize the liquidity of funds. The first priority of the source of funds is diversification and stability, and the Company adopts the conservative principle to estimate the funds. The use of funds should take into account both safety and profitability, and pay attention to diversifying liquidity risks. The Company has set up an Asset and Liability Management Committee, which is responsible for planning and monitoring liquidity risk management strategy and controlling liquidity risk with risk limits from different measuring dimensions and early warning indicators. When the liquidity has or expects significant changes, relevant authorities and responsible units jointly analyze the reasons and discuss solutions to deal with the impact of emergent events on liquidity risk. If necessary, the Asset and Liability Management Committee may be convened to discuss solutions.

# 3) Financial assets held to manage liquidity risk and maturity analysis of non-derivative financial liabilities of the Company

# a) Financial assets held to manage liquidity risk

The Company holds highly marketable and diverse financial assets to meet payment obligations; assets that can be easily liquidated in the event of an unforeseen interruption of cash flow. The financial assets held to manage liquidity risk include cash and cash equivalents, due from the Central Bank and call loans to other banks, financial assets at FVTPL, financial assets at FVTOCI, investments in debt instruments at amortised cost, discounts and loans, and securities purchased under resell agreements.

## b) Maturity analysis of non-derivative financial liabilities of the Bank

The table below shows the analysis of the cash outflow of non-derivative financial liabilities based on the number of days remaining from the balance sheet date until the contractual maturity date. The amount disclosed is based on the contractual cash flows and may be different from that included in the consolidated balance sheets.

					Septe	ember 30, 2023

# c) Maturity analysis of derivative financial liabilities

Net settled derivative financial instruments engaged by the Bank include:

- i. Foreign exchange derivative instruments: Foreign exchange options, non-delivery forwards;
- ii. Interest rate derivative instruments: Swaptions, net settled interest rate swaps and other interest rate agreements.

The table below shows the net settled derivative financial instruments based on the number of days remaining from the balance sheet date until the contractual maturity date. The analysis of contractual maturity dates illustrates all derivative financial instruments listed on the consolidated balance sheets. The amount disclosed is based on contractual cash flow and may be different from that included in the consolidated balance sheets. Maturity analysis of net settled derivative financial liabilities was as follows:

	September 30, 2023				
	0-30 Days	31-180 Days	181 Days-1 Year	Over 1 Year	Total
Derivative financial liabilities at fair value through profit or loss Foreign exchange derivative instruments Interest rate derivative instruments	\$ 248,504 433,984 \$ 682,488	\$ 36,034 1,126,362 \$ 1,162,396	\$ 11,263 4,014,851 \$ 4,026,114	\$ 187 35,265,500 \$ 35,265,687	\$ 295,988 40,840,697 \$ 41,136,685

			September 30, 2022		
	0-30 Days	31-180 Days	181 Days-1 Year	Over 1 Year	Total
Derivative financial liabilities at fair value through profit or loss Foreign exchange derivative instruments Interest rate derivative instruments	\$ 494,567 745,439	\$ 27,821 548,152	\$ 6,486 1,026,801	\$ 28 26,519,479	\$ 528,902 28,839,871
Total	\$ 1,240,006	\$ 575,973	\$ 1,033,287	\$ 26,519,507	\$ 29,368,773

Gross settled derivative financial instruments engaged by the Bank include:

- i. Foreign exchange derivative instruments: Foreign exchange swaps;
- ii. Interest rate derivative instruments: Cross currency swaps;
- iii. Credit derivative instruments: All derivatives shown in gross amount pay a periodic fee in return for a payment by the protection seller on credit event if any occurs.

The table below shows the Bank's gross settled derivative instruments based on the number of days remaining from the balance sheet date until the contractual maturity date. Contractual maturities are evaluated to be the most basic element for understanding all the derivative financial instruments presented on the balance sheets. The disclosed amounts are based on contractual cash flows and parts of the disclosed amounts are not in conformity with related items on consolidated balance sheets. Maturity analysis of gross settled derivative financial liabilities was as follows:

	September 30, 2023				
	0-30 Days	31-180 Days	181 Days-1 Year	Over 1 Year	Total

#### c. Market risk

### 1) Source and definition of market risk

Market risk is the potential gain or loss arising from movements of market price, such as interest rates, foreign exchange rates and equity securities.

The Bank organized market risk management department and the committee of assets and liabilities management. The department and the committee periodically examine the Bank's structure of assets and liabilities; plan the pricing principle of deposit and loan and financing, and uses medium- and long-term funding schemes. While executing the market risk management, the market risk management department periodically provides the related information of management and reports to the authorized managers of the Bank for the management system, such as evaluating position, risk limit management, calculation of profit and loss, pricing model and risk analysis, in order to control the overall market risk.

# 2) Market risk management strategy and process

# Market risk management process

# a) Identification and measurement

The operations department and risk management department of the Bank identify the market risk factors of risk exposure position, and measure the market risk. Market risk factors are the components that could have an impact on the value of financial instruments, such as interest rates, foreign exchange rates, equity securities price, etc., including position, gain and loss, stress testing, sensitivity (DV01, Delta, Vega, Gamma) and Value at Risk (VaR), etc., are used to measure the extent of investment portfolio loss that is influenced by market risk factors.

## b) Monitoring and reporting

The risk management department periodically reports the execution of market risk management target, position and gain/loss control, sensitivity analysis, stress testing, and VaR of equity securities to the board of directors, and helps the board of directors to fully understand the status of market risk management. The Bank also establishes a clear reporting process. Each transaction has the requirements about limitation and stop-loss points. Once the transaction reaches its stop-loss limitation, corresponding measures will be implemented immediately. In special circumstances, the transaction department should document the response plan, report to the executive management for approval and report to the board of directors regularly.

# 3) Risk management policy of the trading book

The trading book is the portfolio of financial instruments and physical investments for the purpose of trading or the hedge on the trading book. Portfolio is held for trading for the purpose of earning profit from the bid-ask spread. Any positions aside from the above trading book will be in the banking book.

## a) Strategy

In order to control market risk effectively and ensure flexibility in operating the transaction strategy, the Bank carries out various assessment and control procedures. The portfolio of trading book has the risk limit for each investment portfolio which is set according to the transaction strategy, category of investment and the annual profit target.

## b) Policy and procedure

The Bank sets the "Rules of Market Risk Management" as the important regulation that should be complied with when holding trading portfolio.

## c) Valuation policy

If the financial instruments of trading book have market values, they should be evaluated at least once each day based on information from independent and easily accessible sources. If the financial instruments are evaluated by a model, a mathematical model should be used prudently, and the assumptions and parameters of the valuation model should be regularly reviewed and examined.

# d) Method of measurement

- i. The assumptions and calculation method are described in the VaR section.
- ii. The Bank executes the stress testing monthly based on the following scenarios: The fluctuation of interest rate at 150bp, changes in domestic and foreign equity securities price at 15% and 20% respectively and foreign exchange rate at 5%, and reports to the risk management committee regularly.

# 4) Interest risk management of trading book

## a) Definition of interest risk

Interest risk is the risk that the trading portfolios suffer losses or the fair value changes due to fluctuations in interest rates. The main instruments include the securities and derivatives that are related to interest rates.

# b) Interest risk management procedure of trading book

The Bank prudently chooses its investment target by studying the credibility and financial position of the securities issuers, and the sovereign risk and the trend of interest rates of the country. According to the operating strategy and the circumstances of the market, the Bank sets the transaction limit and stop-loss limit (including the limits of dealing room, traders, and investment, etc.) of the trading book that are reported to the executive management or the board of directors for approval.

## c) Method of measurement

- i. The assumptions and calculation method are described in the VaR section.
- ii. The Bank measures the investment portfolio's interest risk exposure with DV01 monthly.

## 5) Interest risk management of banking book

The interest risk of banking book means that adverse changes in interest rates affect the value and cash flow of the banking book position, resulting in current or potential risks to the Bank's capital and earnings.

## a) Strategy

Based on the principle of prudent operation and conservation, the first priority is on the diversification and stability of assets and liabilities, and then on safety and profitability, and the Company should pay attention to risk diversification.

## b) Management procedure

The Company has established interest risk indicators of banking book to control the banking book interest risk. If the indicators are abnormal, the possible offset treatment should be evaluated and reported to the Asset and Liability Management Committee to review the asset and liability structure and pricing principles, so as to reduce or control the adverse impact on earnings or net worth.

## c) Method of measurement

Measurement methods of banking book interest risk include repricing gap analysis, earnings viewpoint ( $\Delta$ NII) analysis, and economic value viewpoint ( $\Delta$ EVE) analysis. The Company adopts appropriate measurement methods to manage banking book interest risk in accordance with local regulatory requirements or internal management needs.

# 6) Foreign exchange risk management

## a) Definition of foreign exchange risk

Foreign exchange risk is the gain/loss caused by two currencies exchange at different times. The Bank's foreign exchange risk arises from the derivative instruments, such as spot exchange, forward exchange and foreign exchange option, etc. The Bank's foreign exchange transactions are implemented daily to offset clients' positions. Thus, the Bank is not exposed to significant foreign exchange risk.

# b) Policy, procedure and measurement method of foreign exchange risk management

In order to control foreign exchange risk, the Bank sets the limits of transaction and stop-loss limits for the dealing room and traders. Meanwhile, the Bank also sets the maximum annual loss limit to control the loss within the tolerable extent. Foreign exchange risk is controlled based on VaR. The assumption and calculation of VaR are described in the VaR section.

For foreign exchange risk, the Bank sets the scenario at 5% fluctuation of foreign exchange rates of major currencies to execute the stress testing quarterly, and reports to the risk management committee.

c) The significant portfolios of foreign currency financial assets and liabilities are as follows:

As the Company has a large variety of foreign currencies, it is not practicable to disclose foreign currency exchange gain or loss based on each foreign currency's exposure to major impact. The foreign currency exchange gains were \$1,369,319 thousand and \$1,794,919 thousand for the nine months ended September 30, 2023 and 2022, respectively.

# 7) Risk management of equity securities price

# a) Definition of risk of equity securities price

The market risk of equity securities held by the Bank includes the individual risk from the fluctuation of individual equity securities' market price and general market risk from the fluctuation of the overall price trend.

# b) Purpose of risk management of equity securities price

The purpose is to avoid the massive fluctuation of equity securities price that worsens the Bank's financial situation or earnings; to raise the operating efficiency of capital and strengthen the business operation.

# c) Procedure of risk management of equity securities price

The Bank sets investment limits on market risk in addition to the countries, industries and companies. Above limitation are approved by the board of directors. Once the transaction reaches its stop-loss limitation, response will be implemented immediately. In special circumstances, the transaction department should document the response plan, report to the executive management for approval and report to the board of directors regularly.

### d) Measurement method

The risk of equity securities price in trading book is mainly controlled by VaR.

## 8) Value-at-risk of the trading books

Value-at-risk (VaR) is the Bank's tool to control market risk. VaR is a statistical measure that assesses potential losses of financial instruments caused by changes in risk factors over a specified period of time and at a specific level of statistical confidence. The Bank applies historical simulation with a statistical confidence of 99%. The following form indicates the VaR which is the estimation of potential amount of loss within one day. The statistical confidence of 99% represents the possible fluctuations that would be included in assumed adverse market changes. Based on the assumption, the VaR may exceed the amounts listed in 1 of 100 days due to the price changes in the market. The overall VaR in the market may be less than the aggregate VaR of individual market risk factors.

<b>September 30, 2023</b>						
Factors of Market Risk	Average	Maximum	Minimum	Ending		
Interest rate	\$ 390,249	\$ 578,173	\$ 253,229	\$ 578,173		
Foreign exchange rate	141,062	262,458	99,529	99,698		
Equity securities price	119,487	218,808	61,215	162,478		

December 31, 2022

September 30, 2022						
Factors of Market Risk	Average	Maximum	Minimum	Ending		
Interest rate	\$ 235,997	\$ 292,247	\$ 180,917	\$ 253,229		
Foreign exchange rate	137,897	227,124	66,109	99,901		
Equity securities price	175,836	365,415	91,597	98,791		

The Bank transacts derivative contracts within the allowed market risk limit. The objectives in trading derivative instruments are to meet customers' hedging and trading needs or to manage the Bank's exposure to risks and to generate revenues through trading activities.

# 9) Market risk stress testing

The stress testing is used to measure the maximum loss of risk asset portfolio under the worst-case scenario. The Bank takes into consideration various types of risk factors for holding positions during market risk stress testing and the results will be reported to the executive management regularly.

Stress Testing				
Market/Product	Scenarios	September 30, 2023	December 31, 2022	September 30, 2022
Stock market	Major domestic stock exchanges + 15%	\$ 1,259,579	\$ 524,137	\$ 295,706
	Major domestic stock exchanges - 15%	(1,259,579)	(524,137)	(295,706)
	Major foreign stock exchanges + 20%	105,669	39,238	-
	Major foreign stock exchanges - 20%	(105,669)	(39,238)	-
Interest rate/bond	Major interest rate + 150bp	(5,673,002)	(2,596,593)	(3,128,340)
market	Major interest rate - 150bp	2,980,757	1,408,178	1,521,406
Foreign exchange	Major currencies +5%	575,619	277,947	537,852
market	Major currencies - 5%	(575,619)	(277,947)	(537,852)

Note: The information of stress testing is defined by market risk management.

# 10) Market risk sensitivity analysis

#### a) Interest rate risk

Interest rate factor sensitivities (the present value of one basis point, or "PVBP") represent the change in the net present value of the interest rate derivative portfolios caused by a parallel unit shift of 0.01% (1 basis point) in the interest rates in various yield curves affecting the portfolio. The Bank's interest rate-sensitive portfolios include government bonds, corporate bonds, interest rate swaps, forward rate agreements and interest rate collars.

## b) Foreign exchange risk

Foreign exchange rate factor sensitivities ("FX delta") represent the change of the foreign exchange portfolios (i.e., forward exchange transactions and currency swaps) caused by the underlying currency exchange rate fluctuation.

## c) Equity securities price risk

Equity securities price factor sensitivities ("Equity delta") represent the change of the equity securities price portfolio caused by a parallel unit shift of 1% in the underlying stocks prices fluctuation. The Bank's equity portfolios include stocks and equity index options.

#### 11) Effect of interest rate benchmark reform

The Bank is exposed to USD LIBOR which is subject to interest rate benchmark reform. The exposures arise on derivatives and non-derivative financial assets and liabilities. SOFR (Secured Overnight Financing Rate) is expected to replace USD LIBOR. There are key differences between USD LIBOR and SOFR. USD LIBOR is "forward looking", which implies market expectation over future interest rates, and includes a credit spread over the risk-free rate. SOFR is currently a "backward-looking" rate, based on interest rates from actual transactions, and excludes a credit spread. Therefore, when existing contracts and agreements that reference USD LIBOR transfer to SOFR, adjustments for these differences might need to be applied to SOFR to enable the two benchmark rates to be economically equivalent.

Risks arising from the transition relate principally to the potential impact of interest rate basis risk. If the bilateral negotiations with the Bank's counterparties are not successfully concluded before the cessation of USD LIBOR, the case will bring significant uncertainties to the future interest rate basis applied to financial instruments, and give rise to additional interest rate risk that was not anticipated when the contracts were entered into. If a hedged financial instrument and the related hedging derivative instruments are transited to alternative benchmark rates at different times, it could result in hedge ineffectiveness.

The Bank established a USD LIBOR transition project plan to handle risk management policy changes, internal process adjustments, IT system updates and valuation model adjustments, as well as any related tax and accounting issues in accordance with interest rate benchmark reform. As of September 30, 2023, changes required to IT systems and internal processes have been identified, and the Bank has completed the transition of most LIBOR derivatives and non-derivative financial assets and liabilities to the benchmark interest rate.

#### The Bank

The following table contains details of non-derivative financial instruments held by the Bank as of September 30, 2023 which are subject to the reform and have not transitioned to an alternative benchmark interest rate:

Carrying Amount

Non-derivative financial assets which are subject to the reform

Discounts and loans
Financial assets linked to USD LIBOR

\$ 2,710,323

#### d. Transfers of financial assets

#### Financial assets transferred that have not been fully removed

During the Company's daily operations, transferred financial assets that do not meet the criteria for full derecognition are mostly made up of debt securities used as counterparty collateral for repurchase agreements or equity securities lent as part of securities lending agreement. The nature of these transactions is secured loans, and reflects the liability where the Company is obligated to repurchase the transferred financial assets according to a fixed price in future periods. With respect to such transactions, the Company will not be able to use, sell or pledge such transferred financial assets during the effective period. However, the Company is still exposed to interest rate risk and credit risk, hence they are not derecognized.

The following table is an analysis of financial assets and financial liabilities that have not been fully derecognized:

September 30, 2023							
Category of Financial Assets	Transferred Financial Assets Carrying Value	Related Financial Liabilities Carrying Value	Transferred Financial Assets Fair Value	Related Financial Liabilities Fair Value	Net Fair Value

### e. Offsetting financial assets and liabilities

The Company engages in financial instrument transactions that are offset in accordance with IAS 32, section 42, and the financial assets and financial liabilities that are relevant to such transactions are presented in the balance sheets at net amount.

The Company is also engaged in financial instrument transactions that are not offset in accordance with the regulations, but entered into enforceable master netting arrangements or other similar agreements with counterparties, for example, global master repurchase agreements, global securities lending agreements, or other similar agreements. Financial instruments subject to enforceable master netting arrangement or other similar agreements could be settled at net amount as chosen by the counterparties, or, if not, the financial instruments could be settled at gross amount. However, if one of the counterparty defaults, the other party could choose to settle the transaction at net amount.

Information related to offsetting of financial assets and financial liabilities is disclosed as follows:

## September 30, 2023

#### 51. CAPITAL MANAGEMENT

#### a. Capital adequacy maintain strategy

The eligible capital of the Company must conform to the regulatory capital requirements and achieve the minimum adequacy ratio. The calculation of the eligible capital and regulatory capital should comply with the rules issued by the authorities.

#### b. Capital assessment procedure

To ensure the Company possesses sufficient capital to assume various risk, the Company assesses required capital for the portfolios and characteristics of risk and execute risk management through capital allocation to realize optimization of resources.

#### 52. UNCONSOLIDATED STRUCTURED ENTITIES

The Company does not provide financial support or other support to the unconsolidated structured entities as of September 30, 2023 and 2022. The Company's maximum exposure to loss from its interests in these structured entities is limited to the carrying amount of assets the Company recognized. The information of the recognized unconsolidated structured entities is disclosed as follows:

Type of Structured Entity	Nature and Purpose	<b>Interests Owned</b>
Asset securitization products	Investment in asset securitization products to receive returns	Investment in asset-backed securities issued by the entity

The carrying amounts of assets recognized by the Company as of September 30, 2023, December 31, 2022 and September 30, 2022 relating to its interests in unconsolidated structured entities are disclosed as follows:

	September 30, 2023	December 31, 2022	September 30, 2022
Financial assets at FVTOCI Investments in debt instruments measured at	\$ 17,104,585	\$ 7,052,947	\$ 8,143,749
amortised cost	70,905,852	64,589,746	65,553,783
	\$ 88,010,437	<u>\$ 71,642,693</u>	<u>\$ 73,697,532</u>

# 53. ASSET QUALITY, CONCENTRATION OF CREDIT EXTENSIONS, INTEREST RATE SENSITIVITY, PROFITABILITY AND MATURITY ANALYSIS OF ASSETS AND LIABILITIES

## The Bank

#### a. Credit risk

#### **54. OPERATING SEGMENTS**

For management purposes, the Company divides operating units based on different products and services. The four reportable segments are as follows:

- a. Corporate banking unit: Syndicated loan, large scale, group and general credit business;
- b. Individual banking unit: Deposits and consumer loans, foreign exchange service, endorsement guarantees business, note discounting, safe deposits boxes, credit card related products, and trust business;
- c. International banking unit: Offshore banking units, overseas branches and representative office; and
- d. Other units: These parts contain the Company's assets, liabilities, revenues and expenses that cannot be attributed to or allocated reasonably to certain operating segments.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss.

The analysis of the Company's operating revenue and results by reportable segment was as follows:

		For the Nine M	onths Ended Sept	tember 30, 2023	
	Corporate Banking	Individual Banking	International Banking	Others	Total
Net interest (externally)	\$ 9,797,693	\$ 8,015,870	\$ 4,759,233	<u>\$ 15,927,933</u>	\$ 38,500,729
Segment revenue (expense)	<u>\$ (3,338,004)</u>	<u>\$ 25,469,339</u>	<u>\$ 2,564,163</u>	<u>\$(24,695,498</u> )	<u>\$</u>
